Recomendación de colocación

El efecto "Craquele" se obtiene mediante una fisuración del esmalte. Con el fin de evitar la absorción de agentes de tinción en el tiempo, se aconseja hacer la superficie resistente a las manchas. Debe sellarse antes de rejuntar. Procedimiento: cuando el recubrimiento esté perfectamente limpio y seco, esparcir una capa uniforme de FILA MP / 90 o FILA FOB sin diluir con un cepillo u otro aplicador adecuado. Espere 24 horas y retire el exceso de producto en la superficie, luego enjuague con un paño húmedo.

Recommendation of laying

The "Craquele" effect is obtained via a crazing of the glaze. In order to avoid the absorption of staining agents over time, it is advised to make the surface stain-resistant. Must be sealed prior to grouting. Procedure: when the covering is perfectly clean and dry, spread a uniform layer of undiluted FILA MP/90 or FILA FOB with a brush or other suitable applicator. Wait 24 hours and remove excess product on the surface, then rinse with a damp cloth.
