by Bisk

ABOUT US

BISK was established in 1982 in Poland and is still run by the families of its original founders.

Over thirty years of constant development and improvement of our offer brought us to the leader's position in our domestic market and resulted in our expansion to all major European markets. Being an expert in the field of plastic and metal accessories for bathrooms, we have now diversified our offer to neighbouring product categories. In a nutshell, our philosophy is to remain flexible, which has led us to:

- designing our products to reflect modern trends (our Futura collection has won a red*dot* design award in 2012 and two products of Natura collection has won red*dot* design award in 2013),
- ensuring good quality of products, achieved with the support of our professional staff,
- maintaining reasonable prices,
- understanding customers' needs and providing good service.

Company headquarters in Łubna, Poland
8 000 sqm of warehouse

BISK Collection. Combination of modern collections of bathroom accessories with top quality faucets and shower sets makes it possible to arrange the interior in a harmonious and well considered manner.

Natura collection. Its coherent idea refers in its design to the classical minimalist patterns, while retaining its own unique character. The man and technology, but also the whole world around, meaning NATURE, constitute a direct inspiration for the company's new collection. The collection's state-of-the-art character is due to the ergonomic accent of its shapes.

Toilet paper holder (ref.04312) and basin faucet (ref.04232) won reddot design award in 2013.

Futura collection: design meets ecology. Inspired by strong architectural solids and state - of - the - art technology which increases the comfort of use. Uniquely designed accessories, produced in line with all the principles of environment protection. Futura collection is available in two finishings : black and chrome. **It won reddot design award in 2012.** Products from Futura collection are targeted at the clients who appreciate advanced technology and refined design.

Nord and Arktic collections primarily offer modern design and perfect quality. These accessories are available in two finishings: brushed, providing a toned down, refined appearance, and the very fashionable chrome finishing, which blends perfectly with most colors, traditionally used in bathroom arrangement.

Virginia and Chroma collections perfectly fit modern and more classic interior design. Fine tuned oval forms give the collections a contemporary and most elegant appearance. The collections differ in terms of finishing: VIRGINIA has a delicate, brushed nickel while Chroma is made with a universal chrome finishing.

BISK COLLECTION faucets are not only beautiful objects but foremost highly functional and technologically advanced products which combine user comfort and care for natural environment.

Perlators in our faucets **reduce water usage by up to 70%**, creating soft, aerated water flow for a considerably more serene work of the faucet and significantly increased comfort of use.

SEDAL® **ceramic cartridge** in combination with the **high quality brass** used to produce the bodies ensure that our faucets have an excellent, **long lasting durability**.

Reinforced polyethylene **PEX** used in inner tubes guarantees flexibility, **superb durability** in extreme temperatures and high resistance to chemical agents, such as chlorine. On top of protecting against mechanical damage the hoses with PEX linings **ensure an excellent microbiological protection** as they do not allow any bacteria multiplication. Contrary to standard hoses with rubber lining (EDPM), PEX does not age; it is resistant to wear and tear and therefore it features an extended lifetime.

New, **eco-friendly PVD technology** ensures anti-scratch and **ultra smooth finishing** with **5 times superior durability** than a conventional method of coating.

BISK FEST

BISK FEST

**BISK FEST - an innovative method allowing fixing to a wall with glue paste.
NO DRILLING.**
