KOPALNICE BATHROOMS

OSEBNO. ZASEBNO. POSEBNO. Kopalnice Gorenje.

Tam, kjer se rojevajo prve ideje dneva, kjer podobe še niso nadele mask, tam se vse začne. V objemu vodnih užitkov, v prostoru sproščujoče intimnosti. Kopalnica je edini kotiček, kjer smo lahko resnično tisto, kar želimo biti. Kreativni, edinstveni, sproščeni, elegantni, klasični, moderni ali usklajena kombinacije vsega. Kakor kopalnica Gorenje, ki v svoji paleti stilov vselej sestavi zrcalo naše osebnosti.

OSOBNO. PRIVATNO. POSEBNO. Kupaonice Gorenje.

Tamo gdje se rađaju prve ideje dana, gdje figure još nisu nadjemale maske, tamo sve počinje. U zagrljaju vodenih užitaka, u prostoru relaksirajuće intimnosti. Kupaonica je jedini kutak u kojemu istinski možemo biti ono što želimo biti. Kreativni, jedinstveni, opušteni, elegantni, klasični, moderni ili usklađena kombinacija svega. Kao kupaonica Gorenje, koja u svojoj paleti stilova uvijek sastavlja zrcalo naše osobnosti.

PERSONAL. PRIVATE. SPECIAL. Bathrooms Gorenje.

Where the first ideas of the day are being born, where the images have not yet put on their masks, it is where it all begins. In an embrace of watery pleasures, in a room of relaxing intimacy. The bathroom is the only place where we really be what we want to be. Creative, unique, relaxed, elegant, classical, modern or a balanced combination of it all. Like a Gorenje bathroom which, using its palette of styles, always composes a mirror of our personality.

PERSÖNLICH. PRIVAT. BESONDERS. Badezimmer Gorenje.

Dort, wo die ersten Ideen des Tages geboren werden, wo die Gestalten noch keine Masken tragen, dort beginnt alles. In der Umarmung des Wassergenusses, im Raum des entspannenden Innersten. Das Badezimmer ist der einzige Ort, wo wir das tatsächlich sein können, was wir sein wollen. Kreativ, einzigartig, entspannt, elegant, klassisch, modern oder in Harmonie mit allem – so wie das Gorenje Badezimmer mit seiner Palette von Stilen immer den Spiegel unserer Persönlichkeit darstellt.

Antiplaque zaščitni premaz / Zaštitni premaz antiplaque Antiplaque protective coating / Antiplaque Schutzbeschichtung

Antiplaque premaz je zaščitni premaz, ki poskrbi, da vodne kapljice hitreje zdrsnejo po površini stekla. Preprečuje odlaganje apnenca in nečistoč na steklu.

Zaštitni premaz Antiplaque jest zaštitni premaz koji omogućuje da kapljice vode brže skliznu po površini stakla. Sprječava odlaganje vapnenca i nečistoća na staklu.

Antiplaque coating is a protective coating which makes water drops glide faster on the glass surface, thus preventing limescale and impurities from depositing on glass.

Durch die Antiplaque Schutzbeschichtung wird die Glasoberfläche schneller trocken. Kalk und Schmutz können nicht am Glas abgelagert werden.

Sanitarna je oprema proizvedena od kompozitnoga materijala, čija je osnova mljeveni kamen, povezan poliesterskom smolom.

Otpornost

Materijal je otporan na djelovanje uobičajenih kozmetičkih, dezinfekcijskih sredstava te sredstava za čišćenje. Iznimka su kiseline i lužine u koncentracijama većim od 10%. Materijal je neosjetljiv na razne mrlje, elastičan i teško lomljiv. Površina je nepropusna i ugodna na dodir.

Održavanje

Za čišćenje proizvoda od kompozitnoga materijala možete koristiti uobičajena tekuća sredstva za čišćenje. Ne upotrebljavajte sredstva za čišćenje koja sadrže sitno mljeveni pijesak ili slične grube materijale, jer oštećuju površinu koja potom postane mutna.

Proizvodi osnovne sanitarne opreme od kompozitnoga materijala odgovaraju internome standardu GNOS 19, čija su osnova međunarodni standardi (ANSI, DIN EN)

Sanitary ware is made of composite material based on ground stones bound with polyester resin.

Resistance

The material is resistant to common cosmetics, disinfectants and cleaning agents. The only exceptions are acids and lye in concentrations exceeding 10%. The material is stain resistant, resilient and hard to fracture. The surface is impermeable and pleasant to the touch.

Maintenance

Products made of composite material may be cleaned by using ordinary liquid detergents. Do not use cleaners containing fine sand or similar abrasive ingredients, as these tend to damage and dull the surface.

Basic sanitary ware products made of composite material comply with the internal standard GNOS 19 based on international standards (ANSI, DIN EN).

Sanitarna oprema je izdelana iz kompozitnega materiala, katerega osnova je mlet kamen, povezan s poliestersko smolo.

Odpornost

Materijal je odporen na delovanje običajnih kozmetičnih, dezinfekcijskih in čistilnih sredstev. Izjema so kisline in lugi v koncentracijah večjih od 10%. Material je neobčutljiv na razne madeže, elastičen in težko lomljiv. Površina je nepropustna in prijetna na dotik.

Vzdrževanje

Za čiščenje izdelkov iz kompozitnega materiala lahko uporabljamo običajna tekoča čistilna sredstva. Ne uporabljajte čistil, ki vsebujejo drobno mleti pesek ali podobne grobe materiale, saj poškodujejo površino in ta postane motna. Izdelki osnovne sanitarne opreme iz umetnega marmorja odgovarjajo internemu standardu GNOS 19, ki ima za osnovo mednarodne standarde (ANSI, DIN EN).

Die Sanitäreinrichtung ist aus Kompositmaterial hergestellt, dessen Basis ist der gemahlene Stein mit Kunstharz gebunden.

Beständigkeit

Das Material ist gegen Wirkung der üblichen kosmetischen, Desinfektions- und Reinigungsmittel beständig. Die Ausnahme sind nur die Säuren und Laugen in Konzentrationen höher als 10%. Das Material ist unempfindlich gegen verschiedene Flecken, es ist elastisch und nahezu bruchstabil. Die Oberfläche ist undurchlässig und berührungsangenehm.

Wartung

Produkte aus Kompositmaterial können mit üblichen flüssigen Reinigungsmitteln gereinigt werden. Die Anwendung der Reinigungsmittel mit feingemahlenem Sand oder ähnlichen Grobmaterialien ist nicht zulässig, denn die Oberfläche kann beschädigt und glanzlos werden. Die Elemente der Sanitäreinrichtung aus Kompositmaterial entsprechen dem internen Standard GNOS 19, der auf dem internationalen Standard (ANSI, DIN EN) basiert.

Čista resnica: za bakterije ni prostora

Čista istina: nema mjesta za bakterije

Pure truth: no room for bacteria

Die reine Wahrheit: kein Platz für Bakterien

◀ **Brez skrbi: tudi vaši najmlajši bodo v kopalnici Gorenje varnejši.**

Sanitarna oprema je izdelana iz materiala, čigar receptura zagotavlja izjemno antibakteriološko delovanje površine. Na popolnoma nepropustni in za madeže neobčutljivi površini se pod vplivom vode izločajo ioni, ki preprečujejo rast in razmnoževanje bakterij, kar je dokazano s certifikatom Sanitized®. Učinkovitost je zagotovljena skozi vso življenjsko dobo sanitarne opreme.

Bez brige: u kupaonici Gorenje biti će i vaši najmlađi sigurniji.

Sanitarna je oprema proizvedena od materijala čija receptura osigurava iznimno protubakterijsko djelovanje površine. Na potpuno nepropusnoj i na mrlje neosjetljivoj površini pod utjecajem vode izlučuju se ioni koji sprečavaju rast i razmnožavanje bakterija, što je dokazano certifikatom Sanitized®. Učinkovitost je zajamčena za cijeli životni vijek sanitarne opreme.

No worries: Even the youngest of your children will be safer in a Gorenje bathroom.

Sanitary ware is made of material whose composition gives the surface exceptional antibacterial properties. On the totally impermeable and stain resistant surface and under the influence of water, ions are released to prevent bacterial growth and multiplication, which is confirmed by the Sanitized® certificate. Efficiency is guaranteed throughout the entire service life of the sanitary ware.

Ohne Sorgen: auch Ihre Kleinsten werden im Gorenje Badezimmer sicherer sein.

Das zur Herstellung der Sanitäreinrichtung verwendete Material garantiert die hervorragende antibakteriologische Wirkung der Oberfläche. Auf der wasser- und fleckenbeständigen Oberfläche können die Bakterien durch die Wirkung der freigelassenen Ionen nicht wachsen und sich vermehren. Das ist durch das erworbene Zertifikat Sanitized® nachgewiesen. Diese Wirksamkeit bleibt über die ganze Lebensdauer der Sanitäreinrichtung unverändert.
