BATHROOMS

www.gorenje-no.si

Izbrano. Večno.
Izbrane najbolj kakovostne komponente tvorijo material za izdelavo sanitarne opreme gorenje. To ji daje dolgo življenjsko dobo in omogoča enostavno vzdrževanje.

Odabrano. Vječno.
Samo najkvalitetnejše komponente čine material za izradu sanitarne opreme gorenje. To joj omogočuje dug životni vijek i jednostavno održavanje.

Selected. Eternal.
Only components of the highest quality are used in the production of the gorenje sanitary ware. This gives it a long service life and allows easy care.

Auserwählt. Ewig.
Nur die Spitzenkomponenten bilden das Material zur Herstellung der gorenje Sanitäreinrichtung und sichern eine lange Lebensdauer und einfache Wartung.

IZBRANO. VEČNO.

Dovršeno. Izkušeno.
Tri desetletja razvoja in izkušenj nam dajejo znanje za ustvarjanje dovršenega kopalniškega prostora.

Dorađeno. Provjereno.
Tri desetljeća razvoja i iskustva nude nam znanje za stvaranje dorađenoga kupaoničkoga prostora.

Perfect. Experienced.
In three decades of development and experience, we have gained expertise to create perfect bathroom space.

Perfekt. Erfahren.
Drei Jahrzehnte der Entwicklung und Erfahrungen sind die Garantie für unsere Kenntnisse, das perfekte Badezimmer zu errichten.

DOVRŠENO. IZKUŠENO.

Harmonija med zaobljenostjo oblik in uporabnostjo notranjosti elementov. Predali so opremljeni s kakovostnimi vodili s polnim izvlekom in mehkim zapiranjem.

Harmonija zaobljenosti oblik i upotrebljivosti unutrašnjosti elemenata. ladice su opremljene kvalitetnim vodilicama na puno izvlačenje i mekim zatvaranjem.

A symphony of rounded edges and furniture functionality. Drawers feature quality pull-out telescopic sliding rails and soft closing.

Harmonie zwischen Abrundung der Formen und Nutzung der Innenflächen der Elemente. Dazu beitragen auch die Auszüge und Schubkasten mit dem Vollauszug und Weichschließen.

Odlika kopalnice Oasis so zaobljene linije, ki se popolnoma skladajo s sodobnostjo aluminija in gladkimi vrati brez ročajev.

Odlika kupaonice Oasis jesu zaobljene linije koje su u potpunom skladu sa suvremenošću aluminija i glatkim vratima bez ručki.

Oasis is characterised by soft lines, trendy aluminium, and handle- and knob-free doors.

Die Stärke des Badezimmers Oasis sind die abgerundeten Formen, die im vollen Einklang mit dem modern gestalteten Aluminium und den geraden Türen ohne grif sind.

Čista resnica: za bakterije ni prostora
 Čista istina: nema mjesta za bakterije

Pure truth: no room for bacteria

Die reine Wahrheit: kein Platz für Bakterien

◀ Brez skrbi: tudi vaši najmlajši bodo v kopalnici Gorenje varnejši. Sanitarna oprema je izdelana iz materiala, čigar receptura zagotavlja izjemno antibakteriološko delovanje površine. Na popolnoma nepropustni in za madeže neobčutljivi površini se pod vplivom vode izločajo ioni, ki preprečujejo rast in razmnoževanje bakterij, kar je dokazano s certifikatom Sanitized®. Učinkovitost je zagotovljena skozi vso življenjsko dobo sanitarne opreme.

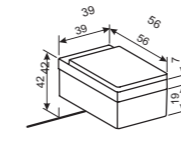

Bez brige: u kupaonici Gorenje biti će i vaši najmlađi sigurniji. Sanitarna je oprema proizvedena od materijala čija receptura osigurava iznimno protubakterijsko djelovanje površine. Na potpuno nepropusnoj i na mrlje neosjetljivoj površini pod utjecajem vode izlučuju se ioni koji sprečavaju rast i razmnožavanje bakterija, što je dokazano certifikatom Sanitized®. Učinkovitost je zajamčena za cijeli životni vijek sanitarne opreme.

No worries: Even the youngest of your children will be safer in a Gorenje bathroom. Sanitary ware is made of material whose composition gives the surface exceptional antibacterial properties. On the totally impermeable and stain resistant surface and under the influence of water, ions are released to prevent bacterial growth and multiplication, which is confirmed by the Sanitized® certificate. Efficiency is guaranteed throughout the entire service life of the sanitary ware.

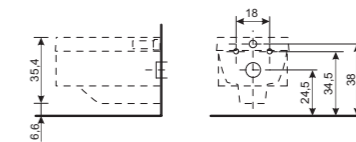

Ohne Sorgen: auch Ihre Kleinsten werden im Gorenje Badezimmer sicherer sein. Das zur Herstellung der Sanitäreinrichtung verwendete Material garantiert die hervorragende antibakteriologische Wirkung der Oberfläche. Auf der wasser- und feckenbeständigen Oberfläche können die Bakterien durch die Wirkung der freigelassenen Ionen nicht wachsen und sich vermehren. Das ist durch das erworbene Zertifikat Sanitized® nachgewiesen. Diese Wirksamkeit bleibt über die ganze Lebensdauer der Sanitäreinrichtung unverändert.

Shower tray and cabin Kuba / Duschwanne und -kabine Kuba

Izpod prhe stopimo suhi v odprt prostor ...
Zakaj pa ne tudi v spalnico?
To nam omogoča inovativna rešitev vrtljivih vrat tuš kabine.

Od tuša stupamo suhi u prostor...
Zašto ne bismo i u spavaću sobu?
To omogućuje inovativno rješenje rotacijskih vrata tuš-kabine.

We exit the shower, already dry and enter the room... Why not the bedroom as well? This is made possible by an innovative solution of the shower cabin's revolving door.

Aus der Dusche treten wir in einen trockenen Raum... Warum nicht auch in das Schlafzimmer? Das ermöglicht uns die innovative Lösung mit Drehtüren der Duschkabine.

Antiplaque zaščitni premaz / Zaštitni premaz antiplaque
Antiplaque protective coating / Antiplaque Schutzbeschichtung

Antiplaque premaz je zaščitni premaz, ki poskrbi, da vodne kapljice hitreje zdrsnejo po površini stekla. Preprečuje odlaganje apnenca in nečistoč na steklu.

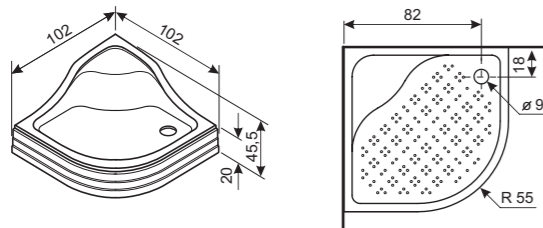

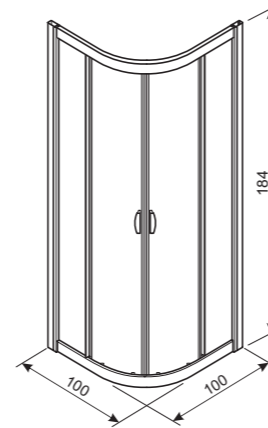

Zaštitni premaz Antiplaque jest zaštitni premaz koji omogućuje da kapljice vode brže skliznu po površini stakla. Sprječava odlaganje vapnenca i nečistoća na staklu.

Antiplaque coating is a protective coating which makes water drops glide faster on the glass surface, thus preventing limescale and impurities from depositing on glass.

Durch die Antiplaque Schutzbeschichtung wird die Glasoberfläche schneller trocken. Kalk und Schmutz können nicht am Glas abgelagert werden.

Program barv sanitarne opreme / Program boja sanitarne opreme
Sanitary ware colours / Farben der Sanitäreinrichtung

DOLOPOL

Biser

Sanitarna je oprema proizvedena od kompozitnoga materijala, čija je osnova mljeveni kamen, povezan poliesterskom smolom.

Otpornost
Materijal je otporan na djelovanje uobičajenih kozmetičkih, dezinfekcijskih sredstava te sredstava za čišćenje. Iznimka su kiseline i lužine u koncentracijama većim od 10%. Materijal je neosjetljiv na razne mrlje, elastičan i teško lomljiv. Površina je nepropusna i ugodna na dodir.

Održavanje
Za čišćenje proizvoda od kompozitnoga materijala možete koristiti uobičajena tekuća sredstva za čišćenje. Ne upotrebljavajte sredstva za čišćenje koja sadrže sitno mljeveni pijesak ili slične grube materijale, jer oštećuju površinu koja potom postane mutna.

Proizvodi osnovne sanitarne opreme od kompozitnoga materijala odgovaraju internome standardu gNOS 19, čija su osnova međunarodni standardi (ANSI, DIN EN)

Sanitary ware is made of composite material based on ground stones bound with polyester resin.

Resistance
The material is resistant to common cosmetics, disinfectants and cleaning agents. The only exceptions are acids and lye in concentrations exceeding 10%. The material is stain resistant, resilient and hard to fracture. The surface is impermeable and pleasant to the touch.

Maintenance
Products made of composite material may be cleaned by using ordinary liquid detergents. Do not use cleaners containing fine sand or similar abrasive ingredients, as these tend to damage and dull the surface.

Basic sanitary ware products made of composite material comply with the internal standard gNOS 19 based on international standards (ANSI, DIN EN).

Sanitarna oprema je izdelana iz kompozitnega materiala, katerega osnova je mlet kamen, povezan s poliestersko smolo.

Odpornost
Material je odporen na delovanje običajnih kozmetičnih, dezinfekcijskih in čistilnih sredstev. Izjema so kisline in lugi v koncentracijah večjih od 10%. Material je neobčutljiv na razne madeže, elastičen in težko lomljiv. Površina je nepropustna in prijetna na dotik.

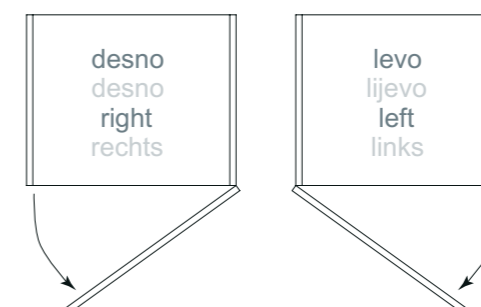

Vzdrževanje
Za čiščenje izdelkov iz kompozitnega materiala lahko uporabljamo običajna tekoča čistilna sredstva. Ne uporabljajte čistil, ki vsebujejo drobno mleti pesek ali podobne grobe materiale, saj poškodujejo površino in ta postane motna. Izdelki osnovne sanitarne opreme iz umetnega marmorja odgovarjajo internemu standardu gNOS 19, ki ima za osnovo mednarodne standarde (ANSI, DIN EN).

Die Sanitäreinrichtung ist aus Kompositmaterial hergestellt, dessen Basis ist der gemahlene Stein mit Kunstharz gebunden.

Beständigkeit
Das Material ist gegen Wirkung der üblichen kosmetischen, Desinfektions- und Reinigungsmittel beständig. Die Ausnahme sind nur die Säuren und laugen in Konzentrationen höher als 10%. Das Material ist unempfindlich gegen verschiedene Flecken, er ist elastisch und nahezu bruchsicher. Die Oberfläche ist undurchlässig und berührungsgenehm.

Wartung
Produkte aus Kompositmaterial können mit üblichen flüssigen Reinigungsmitteln gereinigt werden. Die Anwendung der Reinigungsmittel mit feingemahltem Sand oder ähnlichen grobmaterialien ist nicht zulässig, denn die Oberfläche kann beschädigt und glanzlos werden. Die Elemente der Sanitäreinrichtung aus Kompositmaterial entsprechen dem internen Standard gNOS 19, der auf dem internationalen Standard (ANSI, DIN EN) basiert.
