ROCA CORPORACIÓN EMPRESARIAL

VOCACIÓN GLOBAL

Roca es una empresa dedicada al diseño, la producción y la comercialización de productos para el espacio de baño, pavimentos y revestimientos cerámicos destinados a la arquitectura, la construcción y el interiorismo. El Grupo, de capital íntegramente español, es líder del mercado en Europa, Latinoamérica, India y Rusia. Además tiene una fuerte presencia en China y el resto de Asia, Oriente Medio y África. Roca es líder mundial en su actividad.

GLOBAL VOCATION

Roca is a company devoted to the design, production and sale of products for bathroom areas and floor and wall tiles for use in architecture, construction and interior design. The Group, which is entirely Spanish owned, is market leader in Europe, Latin America, India and Russia. It also has a strong presence in China and the rest of Asia, the Middle East and Africa. Roca is world leader in its activity.

LA VOCATION MONDIALE

Roca est une entreprise vouée à la conception et à la production d'articles pour l'espace bain et de revêtements muraux et de sol, ainsi qu'à leur commercialisation auprès des architectes, des constructeurs et des décorateurs. Le Groupe à capital intégralement espagnol est leader sur le marché en Europe, en Amérique latine, en Inde et en Russie. Il est également fortement présent en Chine et dans le reste de l'Asie, au Moyen-Orient et en Afrique. Roca est leader mondial dans sa branche d'activité.

VOCAZIONE GLOBALE

Roca è un'azienda dedicata al design, la produzione e la commercializzazione di prodotti per l'arredobagno, pavimenti e rivestimenti in ceramica destinati all'architettura, l'edilizia e il design d'interni. Il Gruppo, a capitale interamente spagnolo, è leader del mercato in Europa, America Latina, India e Russia. Ha inoltre una forte presenza in Cina e nel resto dell'Asia, in Medio Oriente e in Africa. Roca è leader mondiale nella sua attività.

VOCAÇÃO GLOBAL

A Roca é uma empresa dedica ao design, à produção e à comercialização de produtos para casas-de-banho, pavimentos e revestimentos cerâmicos destinados à arquitetura, à construção e à decoração de interiores. O Grupo, de capital integralmente espanhol, é líder de mercado na Europa, na América Latina, na Índia e na Rússia. Detém ainda uma forte presença na China e restante continente asiático, no Médio Oriente e em África. A Roca é líder mundial na sua atividade.

GLOBALES BESTREBEN

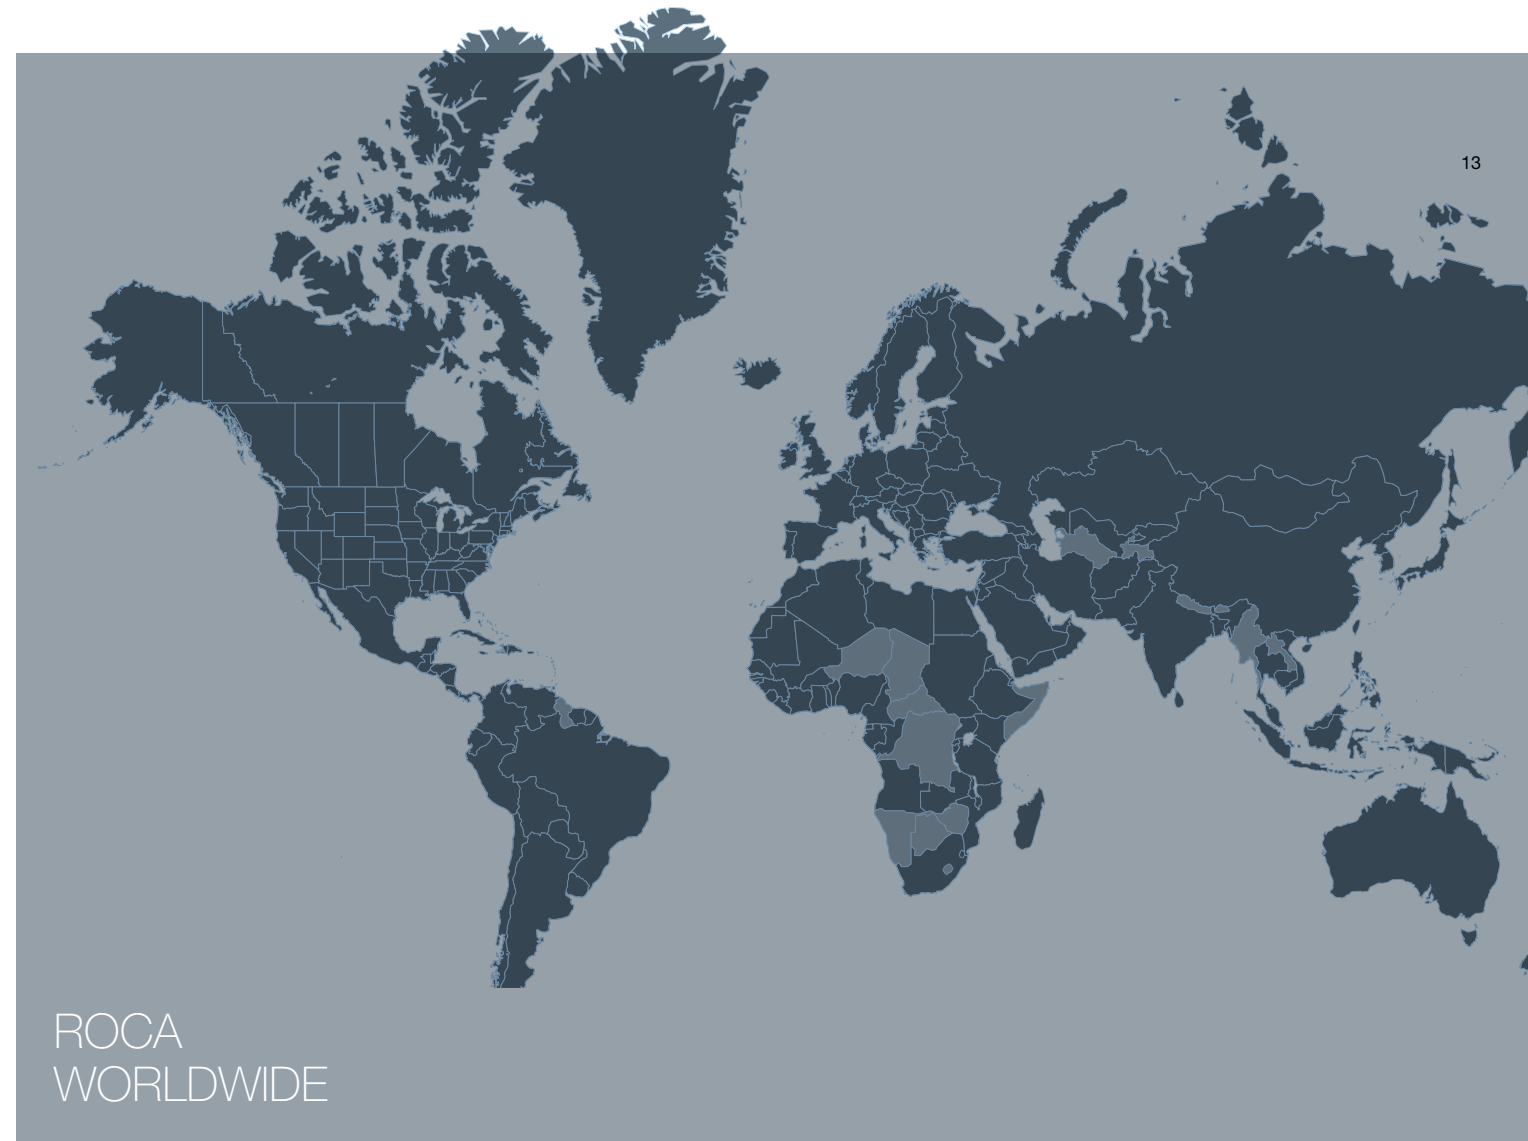

Das Unternehmen Roca ist im Bereich Design, Produktion und Vermarktung von Produkten für das Badezimmer sowie von keramischen Boden- und Wandfliesen für Architektur, Bauwesen und Innenausstattung tätig. Die ausschließlich spanischem Kapital bestehende Firmengruppe ist Marktführer in Europa, Lateinamerika, Indien und Russland. Darüber hinaus verfügt sie über eine starke Präsenz in China und anderen Märkten in Asien, im mittleren Orient und in Afrika. Roca ist Weltmarktführer auf ihrem Gebiet.

ГЛОБАЛЬНОЕ ПРИЗВАНИЕ

Roca — это компания, занимающаяся дизайном, производством и коммерциализацией продуктов для ванной комнаты, напольной и облицовочной керамической плитки для использования в архитектуре, строительстве и интерьер-дизайне. Эта группа предприятий с полностью испанским капиталом является лидером на европейском, латиноамериканском, индийском и российском рынках. Кроме того, она имеет значительное присутствие в Китае и в других странах Азии, Ближнего Востока и Африки. Roca занимает лидирующее место в своей сфере деятельности.

全球使命

Roca Corporación Empresarial, S.A. 是一家西班牙所有的跨国集团的母公司，该集团的产品已遍布全球五大洲。集团目前由两大分支组成：Roca Sanitario 和 Roca Cerámica，主营业务为设计和开发全球卫浴解决方案。

ROCA TILE

PASIÓN POR LA CERÁMICA

Roca Cerámica es el área de negocio del Grupo Roca que se dedica a la producción y la comercialización de pavimentos y revestimientos cerámicos. Creada en 1979, desarrolla la misma filosofía de respeto medioambiental instaurada por Roca, una filosofía ampliamente reconocida a nivel internacional junto a una profunda pasión por el diseño y una absoluta obsesión por la calidad.

PASSION FOR TILES

Roca Tile is the business area of the Roca Group devoted to producing and selling floor and wall tiles. Set up in 1979, it develops the philosophy of respect for the environment established by Roca, a philosophy widely recognised at international level, together with a deep passion for design and an absolute obsession for quality.

LA PASSION POUR LA CÉRAMIQUE

Roca Tile est la division du Groupe Roca qui s'est spécialisée dans la production et la commercialisation de revêtements muraux et de sol. Créée en 1979, elle s'inspire de la philosophie instaurée par Roca, une philosophie respectueuse de l'environnement et amplement reconnue au niveau international, qu'elle allie à une véritable passion pour le design et à l'obsession absolue pour la qualité.

PASSIONE PER LA CERAMICA

Roca Tile è l'area di business del Gruppo Roca che si dedica alla produzione e commercializzazione di pavimenti e rivestimenti in ceramica. Creata nel 1979, segue la stessa filosofia di rispetto ambientale avviata da Roca, una filosofia ampiamente riconosciuta a livello internazionale, associata a una profonda passione per il design e un'assoluta ossessione per la qualità.

PAIXÃO PELA CERÂMICA

A Roca Tile configura-se como a área de negócios do Grupo Roca dedicada à produção e comercialização de pavimentos e revestimentos cerâmicos. Criada em 1979, desenvolve a mesma filosofia de respeito pelo meio ambiente instaurada pela Roca, uma filosofia amplamente reconhecida a nível internacional juntamente com uma profunda paixão pelo design e uma total obsessão pela qualidade.

KERAMIK AUS LEIDENSCHAFT

Roca Tile ist der Geschäftsbereich der Gruppe Roca, der der Produktion und Vermarktung keramischer Boden- und Wandfliesen gewidmet ist. Er wurde im Jahre 1979 gegründet und verfolgt die bei Roca eingeführte und weltweit anerkannte Philosophie des Respekts vor der Umwelt, angetrieben von einer tiefen Leidenschaft für das Design und einem unablässigen Streben nach Qualität.

СТРАСТЬ К КЕРАМИКЕ

Roca Tile представляет собой деловую сферу группы компаний Roca, посвящённую производству и коммерциализации напольной и облицовочной керамической плитки. Созданное в 1979 г., это предприятие основывает свою деятельность на уважении к окружающей среде, (философии, введённой фирмой Roca, и пользующейся широким признанием на международном уровне), а также на страстной любви к дизайну и полной одержимости качеством.

对瓷砖的热情

乐家瓷砖集团隶属于 Roca Corporación Empresarial, S.A.，是专门生产和销售地砖和墙砖的部门。自 1979 年成立以来，集团创造了乐家独有的环保理念并且得到国际社会的广泛认可，公司对设计的热情和对质量的不懈追求亦广为人知。

RESPECTO POR EL MEDIO AMBIENTE

El modelo de gestión empresarial de Roca, basado en la plena conciencia medioambiental y el respeto del entorno, le ha llevado a convertirse en la única industria española del sector de pavimentos y revestimientos cerámicos que ha conseguido la Autorización Ambiental Integrada (AAI) y certificados de calidad como ISO 14001, EMAS y ECOLABEL.

RESPECT FOR THE ENVIRONMENT

The Roca's business management model, based on full environmental awareness and respect for its surroundings, which has led it to become the only Spanish industrial firm in the floor and wall tile sector to achieve the Integrated Environmental Authorisation (AAI) and quality certificates such as ISO 14001, EMAS and ECOLABEL.

LE RESPECT POUR L'ENVIRONNEMENT

Axé sur la conscience et le respect de l'environnement, le modèle de gestion entrepreneuriale de Roca. Il lui vaut d'être la seule industrie espagnole du secteur céramiste à avoir obtenu l'autorisation environnementale intégrée (AAI) et les certificats de qualité ISO 14001, EMAS et ECOLABEL.

RISPETTO PER L'AMBIENTE

Il modello di gestione aziendale di Roca, basato sulla piena coscienza ecologica e sul rispetto dell'ambiente, e le ha consentito di diventare l'unica azienda spagnola del settore dei pavimenti e rivestimenti in ceramica ad avere ottenuto l'Autorizzazione Ambientale Integrata (AAI) e le certificazioni di qualità ISO 14001, EMAS e ECOLABEL.

RESPEITO PELO MEIO AMBIENTE

O modelo de gestão empresarial do Roca, baseado na plena consciência e no respeito pelo ambiente, e levou-a a converter-se na única indústria espanhola do setor de pavimentos e revestimentos cerâmicos a obter a Autorização Ambiental Integrada (AAI) e certificados de qualidade como ISO 14001, EMAS e ECOLABEL.

RESPEKT VOR DER UMWELT

Das Modell der Unternehmensführung von Roca basiert auf einem starken Umweltbewusstsein und dem Respekt vor der Umwelt. Dass Roca in Spanien das einzige Unternehmen im Fliesensektor ist, das die integrierte Umweltgenehmigung (AAI) sowie Qualitätzertifizierungen wie ISO 14001, EMAS und ECOLABEL erhalten hat.

УВАЖЕНИЕ К ОКРУЖАЮЩЕЙ СРЕДЕ

Модель управления концерна Роса, основанная на полном экологическом сознании и уважении к окружающей среде, предполагает наличие общих с материнским предприятием обязательств и позволила ему стать единственным из испанских производителей напольной и облицовочной керамики, получившим разрешение на промышленную эксплуатацию, так называемую Autorización Ambiental Integrada (AAI), и добившимся таких сертификатов качества как ISO 14001, EMAS и ECOLABEL.

尊重环保

乐家瓷砖集团的经营模式以全面的环境意识和尊重环保为基础，与其母公司秉承相同的环保承诺，这使其成为地砖和墙砖行业中唯一一家获得“综合环境授权”（Integrated Environmental Authorisation, AAI）和质量认证（如 ISO14001、EMAS 和 ECOLABEL）的西班牙企业。

LA CERÁMICA INTEGRALMENTE ECOLÓGICA

Greentiles es la materialización de la firme voluntad de Roca de respetar el medio ambiente, una voluntad que va mucho más allá de lo establecido por la legislación vigente.

A través de Greentiles, Roca comunica que su compromiso con el medio ambiente está presente en todos los productos y todas las etapas de su proceso de fabricación, desde el diseño inicial hasta la producción final, pasando por la distribución y el ciclo de vida del producto.

ENTIRELY GREEN TILES

Greentiles embodies Roca's strong desire to respect the environment, a desire that goes far beyond the provisions of current legislation. Through Greentiles, Roca gives notice that its commitment to the environment is present in all its products and at all stages of its manufacturing process, from the initial design to final production, including distribution and the product lifecycle.

LA CÉRAMIQUE INTÉGRALEMENT ÉCOLOGIQUE

Greentiles est la matérialisation de la volonté de Roca de respecter l'environnement, une volonté d'une grande fermeté qui va bien au-delà de la législation en vigueur. Grâce à Greentiles, Roca informe que son engagement vis-à-vis de l'environnement est présent dans tous ses produits et à toutes les étapes de son processus de fabrication, de la conception initiale à la production finale, en passant par la distribution et tout au long du cycle de vie du produit.

LA CERAMICA COMPLETAMENTE ECOLOGICA

Greentiles è il risultato della ferma volontà di rispetto dell'ambiente espressa da Roca, una volontà che va ben oltre quanto stabilito dalle normative vigenti. Con Greentiles, Roca comunica che il suo impegno nei confronti dell'ambiente è presente in tutti i suoi prodotti e in ogni tappa del processo produttivo, dalla progettazione iniziale alla produzione finale, passando attraverso la distribuzione e il ciclo di vita del prodotto.

A CERÂMICA INTEIRAMENTE ECOLÓGICA

Greentiles é a materialização da vontade firme por parte do Roca de respeitar o meio ambiente, uma vontade que ultrapassa em muito o estabelecido pela legislação vigente. Através do Greentiles, o Roca pretende vincar que o seu compromisso com o meio ambiente está presente em todos os produtos e em todas as etapas do seu processo de fabrico, desde o design inicial até à produção final, passando pela distribuição e pelo ciclo de vida do produto.

DIE VOLLSTÄNDIG ÖKOLOGISCHE KERAMIK

Greentiles ist die Verwirklichung des Bestrebens von Roca, dem Umweltschutz zu dienen, ein Wunsch, welcher weit über die gesetzlich festgelegten Vorschriften hinausgeht. Durch Greentiles bringt Roca sein Engagement für den Umweltschutz in all seinen Produkten und in allen Etappen des Fertigungsprozesses zum Ausdruck, vom anfänglichen Design bis zur Endproduktion, im Vertrieb sowie entlang des gesamten Lebenszyklus.

ПОЛНОСТЬЮ ЭКОЛОГИЧЕСКАЯ КЕРАМИКА

Greentiles – это воплощение твёрдого намерения концерна Roca уважать окружающую среду, намерения, идущего гораздо дальше норм, установленных существующим законодательством. Посредством Greentiles Roca наглядно доказывает, что его обязательство бережного отношения к окружающей среде присутствует во всех изделиях и на всех этапах процесса производства с начального дизайна до конечного исполнения, включая дистрибуцию и жизненный цикл продукта.

完全的绿色瓷砖

Greentiles 绿色瓷砖体现了乐家瓷砖集团强烈的环保意愿——这一标准已远远超出现行法律的相关规定。通过 Greentiles 绿色瓷砖，乐家瓷砖集团向世人宣布：其环保承诺已贯穿所有产品以及生产工艺的各个阶段，从最初设计到最终生产，包括分销以及产品的整个生命周期。

TOP  **green** | 80% recycled

BELLEZA Y ELEGANCIA ECOSENSIBLE

Top Green está fabricado con un 80% de material reciclado de preconsumo CERTIFICADO POR BUREAU VERITAS. Una cerámica integralmente ecológica que tiene en cuenta la sostenibilidad durante todo el proceso productivo.

Top Green contribuye a la sostenibilidad de los edificios según el sistema LEED (Leadership in Energy and Environmental Design).

ECO-SENSITIVE BEAUTY AND ELEGANCE

Top Green is manufactured with 80% recycled pre-consumption material, CERTIFIED BY BUREAU VERITAS. It is an entirely green tile, taking sustainability into account throughout the production process. Top Green contributes to sustainability in buildings according to the LEED (Leadership in Energy and Environmental Design) system.

LA BEAUTÉ ET L'ÉLÉGANCE ÉCOSENSIBLE

Top Green est fabriqué à 80 % avec des matériaux recyclés de préconsommation CERTIFIÉS PAR BUREAU VERITAS. C'est une céramique intégralement écologique, respectueuse du développement durable dans tout son processus de production. Top Green contribue à la durabilité des bâtiments conformément au système LEED (Leadership in Energy and Environmental Design).

BELLEZZA ED ELEGANZA ECOSENSIBILE

Top Green è prodotto con l'80% di materiale riciclato di pre-consumo CERTIFICATO DA BUREAU VERITAS. Una ceramica completamente ecologica che non dimentica la sostenibilità lungo tutto il processo di produzione. Top Green contribuisce alla sostenibilità degli edifici in ossequio al sistema LEED (Leadership in Energy and Environmental Design).

BELEZA E ELEGÂNCIA ECO-SENSÍVEIS

Top Green é fabricado com 80% de material reciclado de pré-consumo CERTIFICADO PELO BUREAU VERITAS. Uma cerâmica inteiramente ecológica, que tem em conta a sustentabilidade ao longo de todo o processo produtivo. Top Green contribui para a sustentabilidade dos edifícios, de acordo com o sistema LEED (Leadership in Energy and Environmental Design).

Series Top Green p. 71

ÖKOLOGISCH SENSIBLE SCHÖNHEIT UND ELEGANZ

Top Green wird aus 80% recyceltem Material aus Produktionsabfällen hergestellt und ist diesbezüglich vom BUREAU VERITAS ZERTIFIZIERT. Eine vollständig ökologische Keramik, bei der die Nachhaltigkeit während des gesamten Produktionsprozesses berücksichtigt wird. Top Green trägt zur Nachhaltigkeit von Gebäuden gemäß LEED (Leadership in Energy and Environmental Design) bei.

ЭКОУСТОЙЧИВЫЕ КРАСОТА И ЭЛЕГАНТНОСТЬ

Top Green на 80% состоит из вторично переработанного материала «до потребителя», СЕРТИФИЦИРОВАННОГО БЮРО ВЕРИТАС. Это полностью экологическая керамика, учитывающая критерии экоустойчивости во время всего процесса производства. Top Green способствует экоустойчивости зданий, в соответствии с системой LEED (Leadership in Energy and Environmental Design).

具有环保意识的美丽和优雅。

Top Green 顶级绿色瓷砖由 80% 再生预消耗材料制成——经法国国际检验局认证。从整个生产过程的可持续性而言，这是一种完全绿色的瓷砖。Top Green 顶级绿色瓷砖为 LEED (领先能源与环境设计) 体系建筑的可持续性作出了贡献。

ISO 9001

ISO 9001

Las propiedades antideslizantes de la cerámica fabricada por Roca se clasifican en función del ensayo que se utilice:

Método	Descripción
PÉNDULO (ENV 12633)	Simula un zapato que oscila sobre el azulejo.
RAMPA (DIN 55130 y 51097)	Sitúa a la persona sobre una plataforma de azulejos, dicha plataforma se va inclinando hasta resbalar.
ASTM C1028	Simula el deslizamiento por arrastre de una pesa sobre el azulejo.
TORTUS (ISO-10545/17A)	Se realiza con un aparato mecánico que se desplaza a velocidad constante.

Los métodos de ensayo no son equivalentes entre si, debido a las propias características del ensayo. No obstante, cuanto mayor sea el valor obtenido, más antideslizante será el producto.

Es muy importante seleccionar bien las propiedades antideslizantes del material en función del uso final.

As propriedades antiderrapantes da cerâmica fabricada pela Roca são classificadas em função do teste utilizado:

Método	Descrição
PÉNDULO (ENV 12633)	Simula um sapato que oscila sobre o azulejo.
RAMPA (DIN 55130 e 51097)	Coloca a pessoa sobre uma plataforma de azulejos e essa plataforma vai inclinando até resvalar.
ASTM C1028	Simula a derrapagem por arrasto de um peso sobre o azulejo.
TORTUS (ISO-10545/17A)	Realiza-se com um dispositivo mecânico que se desloca a uma velocidade constante.

A diversidade de métodos de teste utilizados faz com que exista essa mesma diversidade no que toca ao uso recomendado, uma vez que os métodos não são comparáveis entre si, embora seja certo que, quanto mais elevado o valor obtido, mais antiderrapante é o produto.

É muito importante efetuar uma boa seleção das propriedades antiderrapantes do material em função do uso final.

The non-slip properties of Roca's ceramic tiles are classified according to the test used:

Method	Description
PENDULUM (ENV 12633)	Simulates a shoe swinging across the tile.
RAMP (DIN 55130 and 51097)	Places the person on a platform of tiles which tilts until the person slips.
ASTM C1028	Simulates the dragging of a weight over the tile.
TORTUS (ISO-10545/17A)	Performed with a mechanical apparatus which moves at a constant speed.

The diversity of test methods used means that the same diversity exists with regard to the recommended use, since the methods are not comparable between themselves, although it is true that the greater the value obtained, the greater the non-slip rating of the product.

It is very important to select the non-slip properties of the material in accordance with the intended use.

Die Rutschfestigkeit der von Roca hergestellten Keramik wird gemäß der angewandten Prüfmethode klassifiziert:

Methode	Beschreibung
PENDEL (ENV 12633)	Simuliert mithilfe eines Pendels die Bewegung eines Schuhs auf einer Fliese.
RAMPE (DIN 55130 und 51097)	Eine Person geht auf einer gefliesten Oberfläche, die so lange stärker geneigt wird, bis die Person abrutscht.
ASTM C1028	Simuliert einen auf der Fliese durch Ziehen gleitenden Körper.
TORTUS (ISO-10545/17A)	Erfolgt mittels eines mechanischen Geräts, das sich mit gleichbleibender Geschwindigkeit bewegt.

Die Vielseitigkeit der angewandten Prüfmethode führt zu ebenso vielseitigen Empfehlungen in Bezug auf die Verwendung, zumal die Methoden nicht miteinander vergleichbar sind. Allgemein gilt jedoch, dass je höher der ermittelte Wert, umso besser ist die Rutschfestigkeit des Produkts.

Es ist sehr wichtig, die Rutschfestigkeit des Materials in Bezug auf den Verwendungszweck auszuwählen.

Les propriétés antidérapantes du grès cérame de sol Roca sont classées selon la méthode d'essai utilisée :

Méthode	Description
PENDULE (ENV 12633)	Simulation d'une chaussure oscillant sur le carrelage.
RAMPE (DIN 55130 et 51097)	Une plateforme carrelée portant une personne s'incline jusqu'à ce que la personne glisse.
ASTM C1028	Simulation du glissement par traînage d'un poids sur un sol carrelé.
TORTUS (ISO-10545/17A)	Déplacement d'un appareil mécanique à vitesse constante.

La diversité des méthodes d'essai utilisée débouche sur une diversité comparable des usages recommandés, les méthodes n'étant pas comparables entre elles. On peut toutefois affirmer que plus la valeur obtenue est élevée, plus le produit est antidérapant.

Il convient de procéder à une sélection minutieuse des propriétés antidérapantes du matériau en fonction de l'usage prévu.

Противоскользящие свойства керамики производства «Роса» классифицируются в зависимости от используемых испытаний:

Метод	Описание
МАЯТНИК (ENV 12633)	Симулирует туфлю, качающуюся над плиткой.
СКАТ (DIN 55130 и 51097)	Ставят человека на платформу из плиток; платформа постепенно наклоняется, пока не появится скольжение.
ASTM C1028	Симулирует скольжение гири по плитке, как при волочении.
TORTUS (ISO-10545/17A)	Выполняется механическим аппаратом, который перемещается по плитке с постоянной скоростью.

Разнообразие используемых методов испытания приводят к такому же разнообразию в отношении рекомендуемого использования, так как эти методы не поддаются сравнению между собой, хотя и верно, что чем выше получаемое значение, тем менее скользким будет продукт.

Поэтому очень важно правильно выбрать противоскользящие свойства материала в зависимости от конечного использования.

Le proprietà antiscivolo delle ceramiche prodotte da Roca si classificano in base al test impiegato:

Metodo	Descrizione
PENDOLO (ENV 12633)	Simulazione di una scarpa che oscilla sulla piastrella.
RAMPA (DIN 55130 e 51097)	Posizionamento di una persona su una piattaforma di piastrelle che si va inclinando fino a farla scivolare.
ASTM C1028	Simulazione di scivolamento per trascinarsi di un peso sulla piastrella.
TORTUS (ISO-10545/17A)	Effettuato tramite un apparecchio meccanico che si sposta a velocità costante.

Alla diversità dei metodi di prova impiegati corrisponde una diversità d'uso raccomandato del prodotto, in quanto i metodi non possono essere confrontati tra loro. Tuttavia, più alto è il valore ottenuto dal metodo di prova, più alta sarà la proprietà antiscivolo del prodotto.

È molto importante scegliere bene le proprietà antiscivolo del materiale in funzione dell'uso a cui il prodotto è destinato.

Roca 瓷砖的防滑性能是根据如下测试方法进行分类的:

方法	描述
摆测 (ENV 12633)	模拟鞋子在瓷砖上旋转。
斜坡测试 (DIN 55130 y 51097),	让一个人站到瓷砖制成的平台上, 倾斜平台直到人滑倒。
美国材料与试验协会 C1028	模拟重物在瓷砖上拖动。
扭曲测试 (ISO-10545/17A)	用一种匀速运动的机械仪器进行测试。

虽然测试值越高说明产品的防滑性能越好, 但测试方法的多样性意味着瓷砖的推荐用途具有相同的多样性, 因为这些测试方法之间并不具有可比性。

根据既定用途来选择材料的防滑性能十分重要。

Propiedades antideslizantes

En la siguiente tabla se detallan los valores en función de cada ensayo. Los valores indicados en esta tabla son orientativos y por eso Roca recomienda el uso de las Fichas Técnicas del producto que se facilitan a través de nuestra red comercial, para un conocimiento mejor del producto que facilite una elección más acertada.

The following table shows the values according to each test. The values shown in this table are orientative, and therefore Roca recommends using the Technical Sheets of the product provided by our commercial network to gain better knowledge of the product in order to facilitate the most appropriate choice.

Les valeurs sont spécifiées dans le tableau ci-dessous en fonction de chaque essai. Elles sont données à titre indicatif, raison pour laquelle Roca recommande de consulter les fiches techniques de nos produits que vous pouvez vous procurer en contactant notre réseau commercial. Elles vous aideront à mieux les connaître et, partant, à faire le bon choix.

Nella seguente tabella sono riportati i valori in funzione di ogni prova. I valori indicati in questa tabella sono orientativi, pertanto Roca raccomanda l'uso delle Schede Tecniche del prodotto, che vengono fornite attraverso la nostra rete commerciale per conoscere meglio il prodotto e consentire di fare la scelta più appropriata.

Grupos de utilización Roca

362

Roca use groups | Groupes d'utilisation Roca | Gruppi di uso Roca | Grupos de utilização Roca | Anwendungsgruppen von Roca
Группы использования «Roca» | Roca 的应用等级

Antes de seleccionar el producto para una instalación se aconseja siempre verificar el grupo de pertenencia del mismo respecto a la aplicación que se vaya a dar.

Para facilitar esta tarea Roca ha elaborado unos grupos de utilización; es una clasificación orientativa y general, basada en la norma de Abrasión Superficial (ISO 10545-7), la escala Mohs (EN-101), la Resistencia Manchas (ISO 10545-14), la Resistencia Química (ISO 10545-13) y la norma de Abrasión Profunda (ISO 10545-6). Con esto los productos Roca están clasificados a modo de guía de ayuda. Dependiendo de las condiciones de uso, el profesional decidirá el producto adecuado en cada caso.

Grupo	Características
I	Para zonas de muy poco tránsito
II	Para zonas de poco tránsito
III	Para zonas de tránsito moderado
IV	Para zonas de mucho tránsito
V	Pavimentos para tránsito intenso Cumplen especificaciones PEI V, resistencia alta
IV P	Porcelánicos pulidos. Para zonas de mucho tránsito (p. 158)

La elección de productos antideslizantes se puede realizar a través del apartado 'Propiedades Antideslizantes'.

Roca recomienda el uso de las Fichas Técnicas del producto que se facilitan a través de nuestra red comercial o en nuestra página web (www.rocatile.com), para un conocimiento mayor del producto y una elección más acertada.

Aunque la responsabilidad final de la elección de la cerámica Roca es del usuario y de la dirección de la obra, el equipo comercial y técnico de Roca está dispuesto a asesorarle en la elección del producto cerámico.

Antes de seleccionar o produto para instalação, é sempre aconselhável verificar o grupo a que o mesmo pertence, de acordo com a aplicação que dele irá ser feita.

Para facilitar esta tarefa, a Roca elaborou grupos de utilização, uma classificação orientadora e generalista, com base na norma de Abrasão Superficial (ISO 10545-7), na escala Mohs (EN-101), na Resistência a Manchas (ISO 10545-14), na Resistência Química (ISO 10545-13) e na norma de Abrasão Profunda (ISO 10545-6). Com isto, os produtos Roca são classificados como guia de ajuda. Dependendo das condições de uso, o profissional decidirá qual o produto adequado.

Grupo	Características
I	Para zonas de muito pouco trânsito
II	Para zonas de pouco trânsito
III	Para zonas de trânsito moderado
IV	Para zonas de muito trânsito
V	Pavimentos para trânsito intenso Cumrem especificações PEI V, alta resistência
IV P	Produtos porcelânicos polidos. Para zonas de muito trânsito (p. 159)

A seleção de produtos antiderrapantes pode ser efetuada através da secção 'propriedades antiderrapantes'.

A Roca recomenda o uso das Fichas Técnicas do produto facultadas através da nossa rede comercial ou da nossa página web (www.rocatile.com), para melhor conhecimento do produto e uma seleção mais acertada.

Embora a responsabilidade final na seleção da cerâmica Roca seja do utilizador e da direção da obra, a equipa comercial e técnica da Roca está disposta a prestar auxílio nessa seleção.

Before selecting the product for an installation, it is recommended always to check the group to which it belongs with regard to its intended application.

To facilitate this task, Roca has drawn up a list of use groups, which is a general orientative classification based on the Surface Abrasion standard (ISO 10545-7), the Mohs scale (EN-101), Stain Resistance (ISO 10545-14), Chemical Resistance (ISO 10545-13), the Deep Abrasion standard (ISO 10545-6). In this way, Roca's products are classified for guidance. Depending on the conditions of use, the professional will decide on the most suitable product.

Group	Characteristics
I	For zones with very little traffic
II	For zones with little traffic
III	For zones with moderate traffic
IV	For zones with high traffic
V	Floorings with intense traffic Compliant with PEI V specifications, high resistance
IV P	Polished porcelain tiles. For zones with high traffic (p. 160)

The choice of non-slip products can be made in accordance with the 'Non-Slip Properties' Section.

Roca recommends the use of the Product Specification Sheets available through our commercial network or on our website (www.rocatile.com), in order to be more familiar with the product and make the most suitable choice.

Although the final responsibility of the choice of the Roca ceramic tile lies with the user and the works management, Roca's commercial and technical staff will be pleased to advise you on the choice of the ceramic product.

Vor der Auswahl eines Produktes empfehlen wir Ihnen, stets die Gruppenzugehörigkeit des Produktes in Bezug auf die Anwendung zu überprüfen.

Zur Erleichterung dieser Aufgabe hat Roca Anwendungsgruppen erarbeitet, die eine allgemeine und der Orientierung dienende Klassifizierung darstellen. Sie basieren auf der Norm für Oberflächenverschleiß (ISO 10545-7), der Mohs-Skala (EN-101), der Fleckenbeständigkeit (ISO 10545-14), der chemischen Beständigkeit (ISO 10545-13) und der Norm für Tiefenverschleiß (ISO 10545-6). Die Klassifizierung der Roca-Produkte soll Ihnen als Hilfsmittel dienen. Je nach Verwendungsart entscheidet der Fachmann für das geeignete Produkt.

Gruppe	Merkmale
I	Für sehr wenig begangene Bereiche
II	Für wenig begangene Bereiche
III	Für mittelstark begangene Bereiche
IV	Für stark begangene Bereiche
V	Für sehr stark begangene Bodenbeläge Erfüllen die Spezifikationen PEI V, hohe Widerstandsfähigkeit
IV P	Polierte Feinsteinzeugfliesen. Für stark begangene Bereiche (p. 160)

Sie können rutschfeste Produkte entsprechend den Informationen im Abschnitt „Rutschfestigkeit“ wählen.

Für zusätzliche Informationen zum Produkt und für eine optimale Auswahl empfiehlt Roca das Hinzuziehen von Technischen Datenblättern der Produkte, die über unser Vertriebsnetz oder auf unserer Website (www.rocatile.com) erhältlich sind.

Auch wenn die Verantwortung für die Wahl der Roca Keramik letztendlich beim Verbraucher und der Bauleitung liegt, stehen Ihnen unsere Verkaufs- und Technikabteilungen gerne beratend zur Seite.

Avant de sélectionner un produit pour une installation donnée, il est recommandé de vérifier le groupe auquel il appartient au regard de l'application prévue.

Pour faciliter cette étape et à titre d'orientation, Roca a établi des groupes d'utilisation constituant un classement général, basé sur la norme d'Abrasion Superficielle (ISO 10545-7), l'échelle Mohs (EN-101), la résistance aux taches (ISO 10545-14), la résistance chimique (ISO 10545-13) et la norme d'abrasion profonde (ISO 10545-6). Les produits Roca sont ainsi classés à titre d'orientation. En fonction des conditions d'usage prévues, le professionnel peut se baser sur ce classement pour sélectionner le produit adapté.

Groupe	Caractéristiques
I	Zones très peu passantes
II	Zones peu passantes
III	Zones moyennement passantes
IV	Zones très passantes
V	Sol pour passage intense Conforme aux spécifications PEI V, haute résistance
IV P	Grès cérame polis. Zones très passantes (p. 159)

Le choix de produits antidérapants peut se baser sur la section « Propriétés antidérapantes ».

Pour une connaissance approfondie du produit et pour orienter un choix en connaissance de cause, Roca recommande la consultation des Fiches Techniques Produit, disponibles sur demande auprès de son réseau commercial ou sur le site Web (www.rocatile.com).

L'équipe commerciale et technique Roca est à la disposition de la clientèle pour l'orienter dans le choix du grès cérame Roca, la responsabilité finale de ce choix relevant cependant du client et de la maîtrise d'oeuvre du chantier concerné.

Перед тем, как выбрать продукт для укладки, рекомендуется всегда проверить, к какой группе принадлежит данный продукт по своему использованию.

Чтобы облегчить эту задачу, «Roca» выработала серию групп использования; это ориентировочная и общая классификация, в основе которой лежит норма «Устойчивость к стиранию» (ISO 10545-7), шкала МОСа (Mohs) (EN-101), «Устойчивость к образованию пятен» (ISO 10545-14), «Химическая устойчивость» (ISO 10545-13) и норма «Устойчивость к глубинному стиранию» (ISO 10545-6). Таким образом, предлагается своеобразный путеводитель, классификация продуктов марки «Roca». В зависимости от условий использования, профессионал выберет подходящий продукт.

Группа	Характеристики
I	Для мест с очень небольшим движением
II	Для мест с небольшим движением
III	Для мест с умеренным движением
IV	Для мест с большим движением
V	Плитки для интенсивного движения Отвечают требованиям PEI V, высокая прочность
IV P	Шлифованный керамогранит. Для мест с большим движением (p. 161)

Выбор продуктов с противоскользящими свойствами может быть сделан с помощью раздела «Противоскользящие свойства».

«Roca» рекомендует пользоваться техническими описаниями продуктов, которые можно найти в нашей коммерческой сети или на нашем веб-сайте (www.rocatile.com), для того, чтобы лучше узнать конкретный продукт и сделать верный выбор.

Хотя конечная ответственность за выбор того или иного продукта «Roca» лежит на пользователе и на руководстве строительными работами, коммерческое и техническое подразделения компании «Roca» готовы помочь Вам в выборе керамических продуктов.

Prima di scegliere il prodotto per la posa si raccomanda di verificarne sempre il gruppo di appartenenza in base alla tipologia di applicazione.

Per facilitare questa operazione, Roca ha elaborato dei gruppi di uso. Si tratta di una classificazione di carattere orientativo e generale, basata sulle seguenti norme: Abrasione della superficie (ISO 10545-7), Scala Mohs (EN-101), Resistenza alle macchie (ISO 10545-14), Resistenza chimica (ISO 10545-13), Abrasione profonda (ISO 10545-6). In questo modo Roca classifica i suoi prodotti in una sorta di guida all'uso. In base alle condizioni d'uso, il professionista sceglierà il prodotto più idoneo alla sua applicazione.

Gruppo	Caratteristiche
I	Per ambienti sottoposti a traffico leggero
II	Per ambienti sottoposti a traffico medio
III	Per ambienti sottoposti a traffico medio forte
IV	Per ambienti sottoposti a traffico intenso
V	Pavimenti per ambienti sottoposti a traffico particolarmente intenso Conformi ai requisiti della classe PEI V, alta resistenza
IV P	Porcellanati levigati. Per ambienti sottoposti a traffico intenso (p. 158)

È possibile scegliere tra i prodotti antiscivolo consultando il capitolo "Proprietà antiscivolo".

Roca raccomanda l'uso delle Schede Tecniche Prodotto disponibili tramite la nostra rete commerciale o la nostra pagina Web (www.rocatile.com), per conoscere meglio i prodotti e fare una scelta più oculata.

Sebbene la responsabilità ultima della scelta della ceramica Roca è dell'utente e della direzione di cantiere, lo staff commerciale e tecnico Roca è disponibile a supportarla nella scelta della ceramica.

在选择安装哪种产品之前，建议一定要根据既定用途检查一下该产品属于那个等级。

为此，Roca 公司制定了一系列指导性应用等级，其依据为表面磨损标准 (ISO 10545-7)、莫氏硬度 (EN-101)、耐污染性 (ISO 10545-14)、耐化学腐蚀性 (ISO 10545-13) 及深度磨损标准 (ISO 10545-6)。这样，Roca 产品实现了指导性分类，专业人员可以根据使用条件来选择最合适的产品。

	特性
I	用于通行量极少的区域
II	用于通行量较少的区域
III	用于通行量一般的区域
IV	用于通行量较高的区域
V	用于通行量密集的地面 符合 PEI V 规范，高强度
IV P	抛光瓷砖 用于通行量较高的区域 (p. 161)

可根据“防滑性能”部分选择防滑产品。

Roca 建议使用公司商业网络或互联网 (www.rocatile.com) 上提供的产品说明书进一步熟悉产品并作出最佳选择。

尽管选择哪种 Roca 瓷砖的最终决定权属于用户及施工管理方，但 Roca 公司的商务和技术人员还是非常乐于向您建议该选择哪种瓷砖产品。

Recomendaciones de colocación

364

Laying recommendations | Recommandations de pose | Raccomandazioni per la posa | Recomendações de aplicação | Empfehlungen für die verlegung | Рекомендации по укладке | 铺设建议

Una colocación adecuada y cuidadosa de los productos fabricados por Roca es vital para hacer resaltar al máximo las características técnicas de los mismos. Por este motivo, es necesario:

- 1-** Verificar el calibre, tono y calidad del producto, antes de la colocación.
- 2-** Escoger herramientas de instalación adecuadas (llana dentada, maza de goma blanda, ventosa y llana de goma para la aplicación de la junta).
- 3-** Que la superficie sobre la cual vaya a instalarse el material esté nivelada, limpia y aislada de la humedad.
- 4-** Prestar especial atención al tipo de adhesivo a utilizar (consultar con el proveedor habitual de adhesivos), dado que cada tipo de cerámica requiere el adhesivo adecuado. (Norma de referencia: EN-1348).
- 5-** El profesional responsable de la colocación del material, debe elegir adecuadamente las juntas entre piezas, así como las juntas perimetrales, de manera que se garantice una correcta absorción de movimientos estructurales, y una compensación de tolerancias dimensionales del producto. Roca Cerámica recomienda colocar la cerámica con una junta mínima de 1mm y comprobar si en la caja hay otras indicaciones (medidas entre calibres o junta recomendada).
- 6-** No se debe utilizar junta de color que contenga negro de humo (carbón micronizado), ni tintes que puedan dificultar la limpieza de la superficie revestida.
- 7-** Limpiar los restos de rejuntado de la superficie de las baldosas cuando aún están frescos, utilizando una esponja con agua limpia; en ningún caso deben utilizarse materiales que presenten alta dureza y puedan rayar el producto cerámico tales como espátulas metálicas o estropajos abrasivos. Siempre se deben seguir las recomendaciones indicadas por el fabricante de adhesivos.
- 8-** Una vez colocado el azulejo, hay que evitar las operaciones en la zona alicatada (enyesado, pintura, colocación andamios/escaleras, proyección de restos metálicos de radiales, trasiego de herramientas, arrastre de objetos pesados, resto de materiales abrasivos de obra, etc.), en caso contrario, siempre hay que proteger las baldosas y las juntas para evitar posteriores problemas de limpieza o deterioro. El material que se use para esta protección, no debe dañar ni contener productos químicos que dañen al azulejo.

Especial para mosaicos:

Para conseguir el efecto mosaico, las piezas deben colocarse sin separación entre sí y deben rejuntarse en su totalidad. La colocación de los mosaicos Roca es sencilla y rápida, al no precisar crucetas.

Paso 1: Colocar las piezas sin separación.

Paso 2: Rejuntar toda la superficie de las piezas y limpiar el material sobrante.

El acabado exclusivo de los mosaicos, garantiza la perfecta absorción del rejuntado, no necesitando materiales especiales.

Especial para las series Green Living, Toledo, Versailles y Classic Marbles (Calacatta, Campania, Carrara, Onix, Palazzo, Scala):

Para obtener un excelente acabado estético en cuanto al diseño y apreciar todas sus cualidades, Roca recomienda que se mezclen baldosas del mayor número de cajas posible antes de iniciar la instalación.

Especial para las series Lucania y Baltico 25 x 40:

La instalación de las baldosas se efectuará con capa fina utilizando adhesivo cementoso de clase C1, compatible con la superficie a revestir. Dichas superficies deben ser planas y regulares

Especial Colocación de Peldaños:

El soporte estructural debe estar totalmente limpio y enrasado en superficie.

Empezar la colocación desde arriba hacia abajo.

Es imprescindible no dejar zonas sin cemento cola.

Macizar completamente el hueco entre la pared y el borde interior del peldaño.

Colocar siempre la tabica (contra-huella) al mismo nivel que el peldaño.

Se recomienda la protección del peldaño durante la obra.

Se deben evitar golpes directos a los peldaños durante la obra y una vez instalados.

Especial Colocación de formatos rectangulares:

La colocación a rompejunta de formatos rectangulares nunca debe realizarse en la mitad de la pieza.

Se aconseja que para mantener la estética y evitar dificultades en su instalación, la colocación a rompejunta no supere el 25% del lado sobre el que se aplica.

Correct, careful laying of Roca's ceramic products is vital for taking full advantage of their technical characteristics. For this reason, the following points are necessary:

- 1-** Check the calibre, tone and quality of the product before laying.
- 2-** Choose appropriate installation tools (toothed trowel, white rubber hammer, suction grip and rubber trowel for pointing).
- 3-** Ensure that the surface on which the material is to be laid is level, clean and insulated from damp.
- 4-** Pay special attention to the type of adhesive to be used (consult the habitual adhesive supplier), since each type of ceramic requires the appropriate adhesive. (Standard of reference: EN-1348).
- 5-** The professional responsible for laying the material must choose the appropriate joints between pieces and the perimeter joints, in order to guarantee correct absorption of structural movements, and an allowance for dimensional tolerances of the product. Roca Cerámica recommends laying the tiles with a minimum joint of 1 mm and checking for other indications given on the box (measurements between calibres, recommended joint).
- 6-** Do not use coloured pointing material containing black smoke (micronised carbon) or dyes which can hamper the cleaning of the tiled surface.
- 7-** Clean off excess pointing material from the surface of the tiles when it is still fresh, using a sponge and clean water; never use hard materials that could scratch the tiles, such as metal spatulas or abrasive scourers. Always follow the recommendations given by the adhesive manufacturer.
- 8-** Once the tiles are laid, avoid working in the tiled zone (plastering, painting, placing scaffolds/ladders, projecting metallic fragments from disc grinders, moving tools, dragging heavy objects, moving remains of abrasive building materials, etc.) If this cannot be avoided, always protect the tiles and joints to prevent problems of cleaning or deterioration. The materials used for this protection must not be harmful or contain chemical products which may damage the tiling.

Special for mosaics:

To achieve the mosaic effect, the pieces must be laid without separations between them and must be completely pointed. Roca mosaics are quick and easy to lay as they do not require crosspieces.

Step 1: Lay the pieces without separation.

Step 2: Point all the surface of the pieces and clean off excess material.

The exclusive finish of the mosaics guarantees perfect absorption of the pointing material, no special materials being required.

Special for the series Green Living, Toledo, Versailles and Classic Marbles (Calacatta, Campania, Carrara, Onix, Palazzo, Scala):

To obtain an excellent aesthetic finish in terms of design and to appreciate all of its qualities, Roca recommends mixing tiles from the greatest possible number of boxes before commencing installation.

Special for the Lucania and Baltico 25 x 40 series:

The tiles must be installed using a fine layer of class C1 cement-based adhesive, compatible with the surface to be covered. These surfaces must be flat and even.

Special for laying steps:

The substrate must be perfectly clean and smooth.

Begin laying from the top downwards.

Do not leave any zones without cement glue.

Fill completely the gap between the wall and the lower edge of the step.

Always place the riser at the same level as the step.

It is recommended to protect the step surfaces while working.

Avoid direct blows to the steps both during and after installation.

Special for laying rectangular formats:

When laying rectangular formats discontinuously, never do so in the centre of the piece.

In order to maintain the aesthetic appearance and avoid difficulties in installation, we recommend that discontinuous laying does not exceed 25% of the side to which it is applied.

Une pose soignée et techniquement parfaite du carrelage en grès cérames Roca est essentielle pour jouir des caractéristiques techniques des sols. Il convient pour cela de :

1- Vérifier le calibre, le ton et la qualité du produit, avant la pose.

2- Sélectionner un outillage de pose adapté (taloche dentée, maillet en caoutchouc blanc, ventouse et taloche caoutchouc à jointoyer).

3- S'assurer que la surface de pose est nivelée, propre et protégée contre toute humidité.

4- Prêter une attention particulière au type d'adhésif à utiliser (consulter le fournisseur habituel d'adhésifs), car chaque type de grès cérame requiert un adhésif adapté (Norme applicable : EN-1348).

5- Apporter une attention particulière aux joints intermédiaires et périmétraux afin de garantir une absorption des mouvements structurels et une compensation des tolérances dimensionnelles du produit. Roca Ceramica recommande de prévoir un joint de 1 mm au moins et de vérifier si d'autres indications (mesures entre jauges, joint recommandé) figurent sur l'emballage.

6- Ne pas utiliser de joint coloré contenant du noir de fumée (charbon micronisé), ni d'encres susceptibles d'accroître les difficultés de nettoyage de la surface revêue.

7- Nettoyer les restes de joints de la surface du carrelage sans laisser sécher, à l'aide d'une éponge et à l'eau claire. N'utiliser en aucun cas d'ustensiles durs pouvant rayer le carrelage tels que des spatules ou des éponges métalliques. Respecter les indications fournies par le fabricant de l'adhésif.

8- Après la pose, éviter tous travaux dans la zone carrelée (plâtres, peinture, montage d'échafaudage/escaliers, projection de restes métalliques, déplacement d'outillage, restes de matériaux abrasifs de chantiers, traînage d'objets lourds, etc.). Si de telles opérations ont lieu, protéger la zone carrelée et les joints afin d'éviter des problèmes de nettoyage ou d'usure prématurée. On vérifiera que le matériel employé pour les protéger ne puisse les endommager et ne contienne pas de produits chimiques susceptibles de détériorer le carrelage.

Spécial mosaïque :

Pour obtenir un effet de mosaïque, les carreaux doivent être posés bord à bord puis jointoyés sur toute la surface. Ne requérant pas de croisillon, la pose de la mosaïque Roca est simple et rapide.

Étape 1 : Placer les carreaux bord à bord.

Étape 2 : Jointoyer toute la surface des carreaux et nettoyer.

La finition exclusive de la mosaïque assure une absorption parfaite du jointement, aucun matériau spécial n'étant nécessaire.

Spécialement conçu pour les séries Green Living, Toledo, Versailles et Classic Marbles (Calacatta, Campania, Carrara, Onix, Palazzo, Scala) :

Pour obtenir un ouvrage du plus bel effet et en apprécier toutes les qualités esthétiques, Roca vous recommande de mélanger les carreaux du plus grand nombre de cartons possible avant de commencer les travaux.

Spécial pour les séries Lucania et Baltico 25 x 40 :

La pose du carrelage est effectuée avec une fine couche de colle-ciment classe C1, compatible avec la surface à recouvrir, laquelle doit être plane et régulière.

Spécial pose de marches :

Le support structurel doit être totalement propre et plan.

La pose se déroule de haut en bas.

Toute la surface doit être couverte de ciment-colle.

Combler complètement le creux entre le mur et le bord intérieur de la marche.

Poser la contremarche au même niveau que la marche.

La marche doit être protégée pendant la durée des travaux.

Éviter les coups directs sur les marches, au cours des travaux et après la pose.

Spécial pose de formats rectangulaires :

En cas de pose décalée de formats rectangulaires, le décalage ne doit jamais être placé au milieu de la dalle.

Pour des raisons esthétiques et pour éviter toute difficulté de mise en place, il est conseillé de décaler les dalles de 25% au plus de la longueur du bord sur lequel ce type de pose est appliqué.

CERAMIC TILES
CERAMICA

2013-14

365

Una posa idonea e attenta della ceramica prodotta da Roca è di enorme importanza per esaltarne al massimo le caratteristiche tecniche. Per tale ragione, è necessario:

1- Verificare il calibre, il tono e la qualità del prodotto prima della posa.

2- Scegliere gli attrezzi di posa adeguati (cazzuola dentata, martello di gomma bianca, ventosa e raschietto di gomma per l'applicazione dei giunti).

3- Verificare che la superficie di posa del materiale sia livellata, pulita e isolata dall'umidità.

4- Prestare particolare attenzione al tipo di adesivo da usare (consultare il fornitore di adesivi abituale), considerando che ciascun tipo di ceramica richiede un adesivo adeguato. (Norma di riferimento: EN-1348).

5- Il professionista responsabile della posa del materiale deve scegliere adeguatamente i giunti tra i pezzi nonché i giunti perimetrali, in modo da garantire un corretto assorbimento dei movimenti strutturali e una compensazione delle tolleranze dimensionali del prodotto. Roca Cerámica raccomanda di posare la ceramica con un giunto minimo di 1 mm e verificare se nella confezione sono presenti altre indicazioni (misure tra i calibri, giunto raccomandato).

6- Non usare giunti colorati che contengano nerofumo (carbone micronizzato), né tinte che possono rendere difficile la pulizia della superficie rivestita.

7- Pulire i resti di stuccatura delle piastrelle quando sono ancora freschi, usando una spugna con acqua pulita; non usare in nessun caso materiali caratterizzati da un'elevata durezza e che possano graffiare il prodotto ceramico come, ad esempio, spatole metalliche o spugnette abrasive. Seguire sempre le raccomandazioni fornite dal produttore degli adesivi.

8- Una volta posata la piastrella, bisogna evitare qualsiasi operazione sulla zona piastrellata (gessatura, verniciatura, posizionamento di impalcature/scale, proiezione di resti metallici delle smerigliatrici angolari, trasferimento di attrezzi, trascinamento di oggetti pesanti, resti di materiali abrasivi, ecc.). In ogni caso, bisogna sempre proteggere le piastrelle e i giunti per evitare problemi successivi di pulizia o di danneggiamento. Il materiale utilizzato per questa protezione non deve danneggiare né contenere prodotti chimici che rovinino la piastrella.

Speciale per mosaici:

Per ottenere l'effetto mosaico, i pezzi devono essere posati senza separarli tra loro e devono essere stuccati nella loro totalità. La posa dei mosaici Roca è facile e veloce, in quanto non necessita l'uso di crocette.

Passo 1: Posare i pezzi senza separarli.

Passo 2: Stuccare tutta la superficie dei pezzi e pulire rimuovendo il materiale in eccedenza.

La finitura esclusiva dei mosaici garantisce il perfetto assorbimento della stuccatura, in quanto non necessita di materiali speciali.

Speciale per le serie Green Living, Toledo, Versailles e Classic Marbles (Calacatta, Campania, Carrara, Onix, Palazzo, Scala):

Per ottenere un'ottima finitura estetica riguardo al disegno ed apprezzarne tutte le qualità, Roca consiglia di mischiare le piastrelle del maggior numero possibile di casse prima di iniziare la posa.

Speciale per le serie Lucania e Baltico 25 x 40:

L'installazione delle piastrelle richiederà l'uso di uno strato sottile di adesivo cementoso classe C1, compatibile con la superficie da rivestire. Tali superfici devono essere piane e regolari.

Posa speciale di gradini:

Il supporto strutturale deve essere completamente pulito e livellato in superficie.

Iniziare la posa dall'alto verso il basso.

É imprescindibile non lasciare zone prive di adesivo cementizio.

Chiudere completamente la cava tra la parete e il bordo interno del gradino.

Posare sempre l'alzata allo stesso livello del gradino.

Si raccomanda di proteggere il gradino durante i lavori.

Evitare di applicare colpi diretti sui gradini durante i lavori e una volta posati.

Posa speciale di formati rettangolari:

La posa a giunti sfalsati di formati rettangolari non deve essere mai effettuata in corrispondenza della metà dell'elemento.

Per mantenere l'aspetto estetico ed evitare difficoltà di installazione, si consiglia di effettuare la posa a giunti sfalsati in modo che non superi il 25% del lato sul quale viene applicata.

Para mantener la belleza y elegancia de la cerámica Roca, se aconseja la limpieza periódica del material, con sistemas convencionales.

Para la eliminación de restos de polvo y sólidos: por barrido o aspiración.

No se debe utilizar mopas atrappapolvere con siliconas y ceras.

El lavado de la superficie se debe realizar con jabón neutro y la cantidad de agua caliente recomendada por el fabricante.

No se deben usar productos de limpieza abrillantadores, cerosos o con aditivos similares ya que con el paso del tiempo pueden dejar una capa impermeabilizante sobre la cerámica que altera el aspecto superficial de la misma.

Es recomendable la colocación de felpudos, que deberán permanecer limpios, en las entradas a los lugares pavimentados, ya sea desde la calle, terrazas o jardines, para evitar la entrada de elementos abrasivos. Se recomienda especial cuidado en zonas cercanas a playas u obras que pueden aportar arenas y piedras.

Es aconsejable poner protecciones a los objetos que por arrastre pudieran marcar el producto (patas metálicas de mesas, sillas, etc.), teniendo especial rigurosidad con productos brillantes y satinados.

Si la suciedad no se elimina completamente, facilitamos la siguiente tabla, donde se encuentran los agentes limpiadores adecuados para cada tipo de suciedad:

Tipo de mancha	Agente de limpieza
Aceite, Tinta, Rotulador, Tomate, Frutas, Chocolate, Grasa	Disolvente orgánico: alcohol, aguarrás o acetona Detergente alcalino ya sea en líquido o en polvo Bicarbonato
Alquitrán, Caucho, Betún, Pintura, Graffiti, Cera, Resinas, Rotulador, Esmalte de uñas	Disolvente orgánico: alcohol, aguarrás o acetona
Café, Helado, Nicotina, Vino	Detergente alcalino ya sea en líquido o en polvo
Cal, Cemento, Cerveza, Depósitos metálicos , Refrescos, Zumos	Ácidos diluidos: vinagre, sulfumán o ácido clorhídrico
Cola, Goma de mascar, Goma de neumático o zapato	Disolvente orgánico: alcohol, aguarrás o acetona Ácidos diluidos: sulfumán o ácido clorhídrico
Sangre, Mercromina, Yodo	Oxidante: Agua oxigenada

Nunca hay que utilizar productos que contengan fluorhídrico, sólo los indicados en la tabla anterior.

Todos los productos indicados en la tabla se pueden encontrar fácilmente en droguerías y centros comerciales habituales.

Especial para porcelánicos pulidos:

Una vez instalado todo el material y habiendo limpiado los restos de cemento, rejuntado y cualquier material de obra, en algunos productos pulidos, debido al tratamiento superficial de inertización "anti manchas" que se le realiza, puede observarse la presencia de una película "grasa" en la superficie de las piezas. En caso de presentarse esta situación, Roca recomienda la limpieza de la superficie con productos de limpieza en seco (detergentes en polvo), y una vez eliminada esa fina película protectora proceder a la limpieza del producto de la forma anteriormente indicada. Por otro lado, en condiciones extremas de iluminación se pueden producir reflejos y sombras debido al alto grado de brillo y las características del producto. Se recomienda limpiar las manchas de forma inmediata.

To maintain the beauty and elegance of Roca tiles, we advise daily cleaning with conventional methods.

To remove remains of dust and solids: sweeping or vacuum cleaning.

Do not use dust-catcher mops with silicones and waxes.

The surface must be washed with neutral soap and the amount of hot water recommended by the manufacturer.

Do not use cleaning products containing wax, brighteners or similar additives, since in time they may leave a waterproof layer on the tile which alters its surface appearance.

We strongly recommend the use of doormats, which must remain clean, in entrances to tiled areas, whether from the street, terrace or garden, to prevent the entry of abrasive elements. We recommend special care in zones close to beaches or construction works, where there is a risk of sand and stones being brought in.

It is advisable to place protections on objects which can mark the tiles if dragged (metal table legs, chairs, etc.), being especially careful with shiny and satin-finished products.

If the tiles cannot be cleaned completely, we provide the following table showing suitable cleaning agents for each type of dirt:

Type of stain	Cleaning agent
Oil, ink, marker pen, tomato, fruit, chocolate, grease	Organic solvents: alcohol, turpentine, acetone Alkaline detergents in liquid or powder form Bicarbonate
Tar, rubber, shoe polish, paint, graffiti, wax, resins, marker pen, nail varnish	Organic solvents: alcohol, turpentine, acetone
Coffee, ice cream, nicotine, wine	Alkaline detergents in liquid or powder form
Lime, cement, beer, metal deposits, soft drinks, fruit juices	Diluted acids: vinegar, hydrochloric acid
Glue, chewing gum, tyre or shoe rubber	Organic solvents: alcohol, turpentine, acetone Diluted acids: hydrochloric acid
Blood, mercromina, iodine	Oxidant: oxygenated water

Never use any products containing hydrofluoric acid, only those indicated in the table above.

All the products shown in the table can easily be found in ordinary household stores and shopping centres.

Special for polished porcelain tiles:

In the case of polished porcelain tiles, once all the material has been laid and the remains of cement, pointing and any other building material have been cleaned off, on some polished surfaces the presence of an 'oily' film can be observed due to the 'stain-resistant' inertisation treatment they are given. If this occurs, Roca recommends cleaning the surface with dry cleaning products (detergents in powder form) and, once this fine protective film has been eliminated, cleaning the tiles as indicated above. In extreme lighting conditions, light reflections may occur due to the high degree of brightness and the characteristics of the product.

We recommend removing stains immediately.

Pour préserver la beauté et l'élégance des carreaux en grès cérame Roca, il est recommandé de procéder au nettoyage quotidien du carrelage selon des méthodes conventionnelles.

Éliminer les poussières et solides en balayant ou par aspiration.

Ne pas utiliser de serpillière anti-poussière avec des substances à base de silicone ou de la cire.

Laver à l'eau chaude et au savon neutre, dans les proportions recommandées par le fabricant.

Ne pas utiliser de produits lustrants à la cire ou contenant des additifs similaires car ils sont susceptibles de déposer une couche imperméable altérant l'aspect superficiel du carrelage.

Il est vivement recommandé de placer des paillasons propres à l'entrée des zones carrelées (rue, terrasses, jardins) afin d'éviter l'introduction d'éléments abrasifs. Il est conseillé de veiller tout particulièrement aux zones proches de plages ou de travaux, sources potentielles de sable ou de graviers.

Il est conseillé de protéger les éléments susceptibles de marquer le carrelage tels que le piétement métalliques des tables et chaises, etc.), en veillant particulièrement aux produits brillants et satinés.

Si l'état du carrelage justifie un nettoyage plus approfondi, le tableau suivant présente les agents nettoyants adaptés à chaque type de tache:

Type de taches	Agent nettoyant
Huile, encre, feutre, tomate, fruits, chocolat, graisses	Solvant organique : alcool, WhiteSpirit, acétone Détergent alcalin liquide ou en poudre Bicarbonate
Goudron, caoutchouc, bitume, peinture, graffiti, cire, résines, feutre, vernis à ongles	Solvant organique : alcool, WhiteSpirit, acétone
Café, glaces, nicotine, vin	Détergent alcalin liquide ou en poudre
Chaux, ciment, bière, dépôts métalliques, rafraichissements, jus de fruits	Acides dilués : vinaigre, acide chlorhydrique
Colle, chewing-gum, marque de pneu ou de semelle de chaussure	Solvant organique : alcool, WhiteSpirit, acétone Acides dilués : acide chlorhydrique
Sang, mercurochrome, iode	Oxydant : eau oxygénée

Eviter les produits contenant du fluorure d'hydrogène. N'utiliser que les produits indiqués dans le tableau ci-dessus.

Tous les produits indiqués dans le tableau sont disponibles en drogueries et dans les grands magasins habituels.

Spécial pour le grès cérame poli :

Après la pose de carrelage en grès cérame technique poli, une fois les restes de ciment, de jointement ou autres nettoyés, certains produits polis peuvent présenter une pellicule grasse due au traitement superficiel « anti-taches ». Dans un tel cas, Roca recommande de nettoyer la surface à l'aide de produits de nettoyage à sec (détergents en poudre) puis, après élimination de la pellicule de protection, de procéder au nettoyage selon les méthodes indiquées plus haut. En outre, des conditions d'éclairage particulières peuvent provoquer des reflets dus à la grande brillance et aux caractéristiques du produit.

Il est conseillé de nettoyer immédiatement les taches.

Per mantenere la bellezza e l'eleganza della ceramica Roca, si consiglia la pulizia giornaliera del materiale mediante l'uso di sistemi convenzionali.

Per la rimozione dei resti di polvere e solidi: spazzatura o aspirazione.

Non utilizzare spazzoloni acchiappapolvere con siliconi e cere.

Il lavaggio della superficie deve essere effettuato con sapone neutro e la quantità d'acqua calda raccomandata dal produttore.

Non usare prodotti per la pulizia come brillantanti, cere o additivi simili in quanto con il passare del tempo possono creare una pellicola impermeabilizzante sulla ceramica che ne altera l'aspetto della superficie.

Si consiglia vivamente, accedendo da strade, terrazze o giardini, l'uso di zerbini all'ingresso delle zone pavimentate per evitare l'introduzione di elementi abrasivi. Mantenerli puliti. Si raccomanda una particolare cura in zone prossime a spiagge o cantieri che possono essere causa dell'introduzione di sabbia e pietre.

Si consiglia di ricoprire con una protezione gli oggetti che, se trascinati, possono rigare il prodotto (piedi metallici di tavoli, sedie, ecc.), prestando particolare attenzione in caso di prodotti lucidi e satinati.

Nel caso in cui non sia possibile rimuovere lo sporco completamente, nella seguente tabella riportiamo gli agenti pulenti idonei per ciascun tipo di sporco:

Tipo di macchia	Agente pulente
Olio, inchiostro, pennarello, pomodoro, frutta, cioccolato, grasso	Solvente organico: alcol, acquaragia, acetone Detergente alcalino liquido o in polvere Bicarbonato
Catrame, gomma, bitume, vernice, graffito, cera, resine, pennarello, smalto per unghie	Solvente organico: alcol, acquaragia, acetone
Caffè, gelato, nicotina, vino	Detergente alcalino liquido o in polvere
Calce, cemento, birra, depositi metallici, bibite, succhi	Acidi diluiti: aceto, acido muriatico o acido cloridrico
Colla, gomma da masticare, gomma di pneumatico o di scarpa	Solvente organico: alcol, acquaragia, acetone Acidi diluiti: acido muriatico o acido cloridrico
Sangue, mercurocromo, iodio	Ossidante: acqua ossigenata

Non usare mai prodotti contenenti acido fluoridrico. Usare solo i prodotti indicati nella tabella di cui sopra.

Tutti i prodotti indicati nella tabella si trovano facilmente presso drogherie e centri commerciali.

Speciale per porcellanati levigati:

In caso di porcellanati tecnici levigati, una volta posato tutto il materiale e rimosso i resti di cemento, stucco e di qualsiasi altro materiale, in alcuni prodotti levigati - dovuto al trattamento della superficie con inertizzazione "antimacchia", - è possibile osservare la presenza di una pellicola "grassa" sulla superficie. In tal caso, Roca raccomanda di pulire la superficie con prodotti per la pulizia a secco (detergenti in polvere) e, una volta rimossa la fine pellicola di protezione, di procedere alla pulizia del prodotto come precedentemente indicato. Inoltre, in condizioni di illuminazione estreme possono verificarsi riflessi di luce, dovuto all'alto grado di brillantezza e alle caratteristiche del prodotto.

Si raccomanda di pulire immediatamente le macchie.

Limpieza de un baño con productos para el hogar.

Limpieza de un baño con productos para el hogar.

Limpieza de un baño con productos para el hogar.

Limpieza de un baño con productos para el hogar.

Para manter a beleza e a elegância da cerâmica Roca, é aconselhável a limpeza diária do material, através de sistemas convencionais.

Para a eliminação de restos de pó e sólidos: por varredura ou aspiração.

Não devem ser utilizadas mopas agarra-pó com silicoes e ceras.

A lavagem da superfície deve ser efetuada com sabão neutro e a quantidade de água quente recomendada pelo fabricante.

Não devem ser utilizados produtos de limpeza abrillantadores, céreos ou com aditivos similares, dado que, com o passar do tempo, podem deixar uma capa impermeabilizante sobre a cerâmica, que altera o aspecto superficial da mesma.

É absolutamente recomendável a colocação de capachos, que deverão permanecer limpos, nas entradas dos locais pavimentados, com ligação a ruas, terraços ou jardins, para evitar a entrada de elementos abrasivos. É também recomendável um cuidado especial em zonas próximas a praias ou obras que possam incluir areias e pedras.

É aconselhável colocar proteções nos objectos que, por arrasto, possam marcar o produto (pernas metálicas de mesas, cadeiras, etc.), tendo especial cuidado com produtos brilhantes e acetinados.

Se a sujidade não for eliminada completamente, sugerimos a consulta da tabela seguinte, onde se encontram os agentes de limpeza adequados a cada tipo de sujidade:

Tipo de mancha	Agente de limpeza
Óleo, Tinta, Rotulador, Tomate, Fruta, Chocolate, Gordura	Dissolvente orgânico: álcool, aguarrás, acetona <p>Detergente alcalino líquido ou em pó</p> <p>Bicarbonato</p>
Alcatrão, Borracha, Betume, Pintura, Graffiti, Cera, Resinas, Rotulador, Esmalte de unhas	Dissolvente orgânico: álcool, aguarrás, acetona
Café, Gelado, Nicotina, Vinho	Detergente alcalino líquido ou em pó
Cal, Cimento, Cerveja, Depósitos metálicos , Refrescos, Sumos	Ácidos diluídos: vinagre, ácido hidroclórico ou ácido clorídrico
Cola, Pastilha elástica, Borracha de pneu ou sapato	Dissolvente orgânico: álcool, aguarrás, acetona
Sangue, Mercurocromo, Iodo	Oxidante: Água oxigenada

Nunca utilizar produtos que contenham ácido fluorídrico, apenas os indicados na tabela anterior.

Todos os produtos indicados na tabela podem ser encontrados facilmente em drogarias e nos centros comerciais habituais.

Especial para produtos porcelânicos polidos:

No caso de produtos porcelânicos técnicos polidos, uma vez instalado todo o material, limpos os restos de cimento, rejuntamento e qualquer material de obra, em alguns produtos polidos - devido ao tratamento superficial de inertezação "anti-manchas" que é realizado - poderá surgir uma película "gordurosa" na superfície das peças. Nesse caso, a Roca recomenda a limpeza da superfície com produtos de limpeza a seco (detergentes em pó) e, uma vez eliminada essa fina película protetora, proceder à limpeza do produto da forma anteriormente indicada. Por outro lado, em condições extremas de iluminação, podem produzir-se reflexos de luz devido ao elevado grau de brilho e às características do produto.

É recomendável limpar as manchas de imediato.

Limpeza de um banheiro com produtos para o lar.

Limpeza de um banheiro com produtos para o lar.

Um die Schönheit und Eleganz der Roca Keramikfliesen zu bewahren, wird die tägliche Reinigung des Materials mit konventionellen Mitteln empfohlen.

Für die Reinigung von Staubresten und Feststoffen: kehren oder saugen.

Bitte keine Staubwedel mit Silikon und Wachs verwenden.

Die Reinigung der Oberfläche muss mit neutraler Seife erfolgen und die vom Hersteller empfohlene Wassermenge eingehalten werden.

Verwenden Sie keine Poliermittel oder Reinigungsmittel mit Wachs oder ähnlichen Zusatzstoffen, da sich im Laufe der Zeit möglicherweise eine wasserdichte Schicht auf der Keramikfliese bildet, die das Aussehen der Fliese verändern kann.

Das Auslegen von sauberen Fußmatten an den Eingängen zu gefliesten Bereichen, d. h. am Hauseingang und an den Eingängen zu Terrasse oder Garten, wird dringend empfohlen, um keine scheuernde Gegenstände in das Haus zu bringen. Besondere Vorsicht ist in Strand- oder Baustellennähe aufgrund des Sandes und kleiner Steinchen geboten.

Es wird empfohlen, Gegenstände, die die Fliesen durch Reibung beschädigen könnten, mit Schutzmaterial auszustatten (Metallbeine von Tischen und Stühlen...), vor allem im Fall von polierten und satinierten Ausführungen.

Falls nicht aller Schmutz vollständig entfernt werden kann, richten Sie sich bitte nach folgender Tabelle, in der die geeigneten Reinigungsmittel für jede Art von Schmutz aufgelistet sind.

Fleckenart	Reinigungsmittel
Öl, Farbe, Filzstift, Tomate, Obst, Schokolade, Fett	Organisches Lösungsmittel: Alkohol, Terpentin, Aceton <p>Alkalisches Lösungsmittel, flüssig oder als Pulver</p> <p>Bikarbonat</p>
Teer, Gummi, Schuhcreme, Farbe, Graffiti, Wachs, Harz, Filzstift, Nagellack	Organisches Lösungsmittel: Alkohol, Terpentin, Aceton
Kaffee, Eis, Nikotin, Wein	Alkalisches Lösungsmittel, flüssig oder als Pulver
Kalk, Zement, Bier, Metallspuren, Erfrischungsgetränke, Saft	Verdünnte Säuren: Essig, Salzsäure oder Chlorwasserstoffsäure
Kleber, Kaugummi, Reifengummi, Gummistriche durch Schuhsohlen	Organisches Lösungsmittel: Alkohol, Terpentin, Aceton <p>Verdünnte Säuren: Essig, Salzsäure oder Chlorwasserstoffsäure</p>
Blut, farbige Desinfektionsmittel wie z.B. Jodtinktur	Oxidationsmittel: Wasserstoffperoxid

Unter keinen Umständen Produkte mit Fluorwasserstoff, sondern ausschließlich die in der vorstehenden Tabelle genannten Produkte, verwenden.

Alle in der Tabelle aufgeführten Produkte erhalten Sie problemlos in Drogerien und gewöhnlichen Einkaufszentren.

Speziell für polierte Feinsteinzeugfliesen

Nach dem Verlegen des Materials, dem Entfernen der Zementreste, der Fugenmasse und sonstigem Material kann im Falle von polierten technischen Feinsteinzeugfliesen aufgrund der durchgeführten Oberflächenbehandlung zur Fleckenbeständigkeit eine „Fettschicht“ auf der Oberfläche der Fliesen beobachtet werden. Ist dies der Fall, empfiehlt Roca eine Trockenreinigung der Oberfläche (Reinigungsmittel in Pulverform) und nach dem Entfernen der dünnen Schutzschicht die Reinigung der Fliesen in der zuvor beschriebenen Form. Bei extrem hellen Lichtverhältnissen können Lichtreflexe aufgrund des hohen Glanzgrades und den Eigenschaften des Produktes entstehen.

Es wird empfohlen, die Flecken sofort zu entfernen.

Для поддержания красоты и элегантности керамики «Роса» советуем ежедневно поддерживать чистоту материала, используя обычные средства.

Для удаления остатков пыли и твёрдого мусора: подметать или убирать пылесосом.

Не допускается использование содержащих силикон или воск швабр для удаления пыли.

Поверхность следует мыть нейтральным моющим средством, используя для него такое количество воды, которое указано изготовителем.

Нельзя использовать чистящие средства для блеска, средства, содержащие воск или подобные элементы, так как со временем они могут образовать непроницаемый слой поверх керамики, что испортит вид плитки.

Настойчиво рекомендуем использование ковриков, которые должны содержаться в чистоте, на входе в помещения с плиточными полами, будь то вход с улицы, с балкона или из сада; это предотвратит попадание абразивных элементов на плитку. Рекомендуется обращать на это особое внимание там, где поблизости расположен пляж или ведутся ремонтно-строительные работы, откуда могут быть занесены песок и камни.

Советуем защищать предметы, перемещение по полу которых могло бы поцарапать плитку (металлические ножки столов, стульев и т.п.), обращая особое внимание на блестящие и лощёные продукты.

Если грязь не удаётся удалить полностью, советуем обратиться к следующей таблице, в которой приводятся чистящие вещества, подходящие для каждого вида загрязнения:

Вид пятна	Чистящее вещество
Масло, чернила, фломастер, томат, фрукты, шоколад, жир	Органический растворитель: спирт, скипидар, ацетон <p>Щелочные моющие средства, как жидкие, так и порошки</p> <p>Бикарбонат</p>
Гудрон, каучук, мазь для чистки обуви, краска, граффити, воск, смола, фломастер, лак для ногтей	Органический растворитель: спирт, скипидар, ацетон
Кофе, мороженное, никотин, вино	Щелочные моющие средства, как жидкие, так и порошки
Известь, цемент, пиво, металлические отложения, прохладительные напитки, соки	Растворимые кислоты: уксус, соляная кислота
Клей, жевательная резинка, шинная резина или резина от подошвы	Органический растворитель: спирт, скипидар, ацетон <p>Растворимые кислоты: соляная кислота</p>
Кровь, меркурохром, йод	Окислитель: Перекись водорода

Никогда не используйте продукты, содержащие фтороводородную кислоту, используйте только продукты, указанные в предыдущей таблице.

Все продукты, приведённые в таблице, можно легко найти в аптеке или в обычных магазинах.

Специально для шлифованного керамогранита:

При работе с техническим шлифованным керамогранитом, после того, как был уложен весь материал и были убраны все остатки цемента, раствора и других ремонтно-строительных материалов, иногда из-за инертизации поверхности, её обработки против пятен, на поверхности плиток может появиться «жирная» плёнка. В этом случае «Роса» рекомендует очистить поверхность продуктами сухой чистки (порошковые чистящие средства), и после удаления этой защитной плёнки, можно будет продолжить чистку плитки выше указанным способом. С другой стороны, при очень сильном освещении могут возникнуть отблески света, вызванные высокой степенью блеска и характеристиками продукта.

Рекомендуем выводить пятна немедленно.

为保证 Roca 瓷砖的整洁优雅，建议每天用传统方法清洁处理。

去除灰尘或固体残留物：清扫或用真空吸尘器。

不建议使用带有硅树脂和蜡的吸尘拖把。

切勿使用带有硅树脂和蜡的除尘拖把。

不要使用含有蜡、光亮剂或类似添加剂的清洁产品，因为经常使用这些产品会在瓷砖表面留下防水层，从而改变其外观。

强烈建议在街道、露台或花园到铺设瓷砖区域的入口处安装擦鞋垫，并保证其清洁，以防止带入研磨性物质。我们建议应特别注意保护临近海滩或建筑工地的瓷砖区域，防止带入沙子和石头。

建议在拖拉后可能划伤瓷砖表面的物体（如金属桌腿、椅子等）上安装保护装置，对于磨光及经丝光打磨的瓷砖产品要格外注意保护。

如果瓷砖无法完全清洗干净，我们提供了如下表格说明每种污渍适用的清洁剂：

污渍种类	清洁剂
油、墨水、记号笔、西红柿、水果、巧克力、油脂	有机溶剂：酒精、松节油、丙酮等 <p>液体或粉末状碱性清洁剂</p> <p>碳酸氢钠</p>
沥青、橡胶、鞋油、油漆、涂鸦、蜡、树脂、记号笔、指甲油	有机溶剂：酒精、松节油、丙酮等
咖啡、冰淇淋、烟碱、果酒	液体或粉末状碱性清洁剂
石灰、水泥、啤酒、金属涂膜、软饮料、果汁	稀释酸：醋酸、盐酸
胶水、口香糖、轮胎或鞋橡胶	有机溶剂：酒精、松节油、丙酮等 <p>稀释酸：盐酸</p>
血渍、汞溴红、碘酒	氧化剂：双氧水

千万不要使用任何含氢氟酸的产品，仅可以使用上表中所列的清洁产品。

抛光瓷砖的特殊要求：

抛光瓷砖的特殊要求：

抛光瓷砖的特殊要求：

抛光瓷砖的特殊要求：

对于经过抛光处理的瓷砖，一旦铺设完毕并将水泥、填缝物质及其他建筑材料的残留物清除干净后，由于经过“防污渍”惰性处理，部分抛光瓷砖表面会出现一层“油状”薄膜。出现上述情况后，Roca 公司建议用干性清洁产品（粉末状清洁剂）对瓷砖表面进行清理，当保护膜被彻底清除干净以后，即可用前面提到的方法对瓷砖进行清洗了。在极其明亮的环境中，由于产品具有很高的光亮等级和特性，可能发生光线反射的现象。

建议立即清除污渍。

Roca

The Roca logo consists of the word "Roca" in a bold, white, sans-serif font. Below the text is a white graphic element that resembles a stylized wave or a horizontal bar with a slight curve at the ends.
