OVER 140 YEARS OF EXPERIENCE

Arabia porcelain factory was founded in 1874 and it soon expanded its range to include WCs and washbasins.

For many decades, the factory was the only Nordic manufacturer of sanitary porcelain.

As demand for sanitary porcelain grew, the premises at Arabianranta soon became too confined, and a new production facility was established in Tammisaari. The extensively automated factory started its operations under the name of Oy Wärtsilä Ab, but changed to Tammisaaren Posliini in 1969. The current name IDO Kylpyhuone Oy was taken into use in February 1992. The site remains in operation as one of the most modern sanitary porcelain factories in Europe, and the only one of its kind in Finland.

IDO Kylpyhuone Oy's other product groups also have a long and illustrious history. IDO Showerama showers, for example, conquered Sweden more than 40 years ago. Even back then, success was built on the products' unique characteristics and practical solutions for an easier life. Showerama was the first shower with glass walls instead of plastic for easier cleaning.

Our history has set the bar high, which is why we invest continuously in production technology, product development and quality control. We want the past 140 years to be a prelude to a fantastic future.

IDO DESIGNERS

IDO bathrooms are well-known for their quality and well-developed design solutions. Their design has been carefully considered right down to the last detail. Our reputation is not accidental as our products are created by a team of talented and professional designers with diverse national backgrounds.

Norwegian designer Einar Hareide started his career in design in the Swedish car manufacturer`s Saab factory in 1985. Hareide has established his own company, Hareide Design. Its offices are located in Moss. Norway, and in Gothenburg, Sweden.

IDO Showerama 8-5

IDO Seven D (ceramics and furniture), IDO Mosaik, IDO Shape and IDO Wave

Kaarle Holmberg is an internationally renowned Finnish designer. In addition to product design, Holmberg has taught furniture and interior decoration design, and has shared his abundant knowledge with many students. Most of all he emphasizes the importance of quality in design as well as production.

Hareide Design designs a variety of products ranging from furniture to cars. The company has won many design awards and its products can be seen, for example, among the permanent exhibition of the New York Museum of Modern Arts.

The IDO Showerama 8-5 shower cubicle has been designed by **Dan Sevaldson**, a designer working in Hareide Design Gothenburg office. The goal was to design a shower cabinet which resembles an item of furniture and goes with any style of interior decoration.

Swedish designer Fredrik Wallner manages the Stockholm design company CODE. Wallner has worked as an interior architect for IKEA and in highly-reputed Scandinavian design and architectural offices.

Everything you need can be fitted into the smallest of bathrooms if you plan carefully and use the right products. Think about how the bathroom will be used and by whom. Will the shower be used at the same time as the WC? Or the washbasin? If you can take it in turns with your morning routine, you can make even a small space into an attractive and practical bathroom.

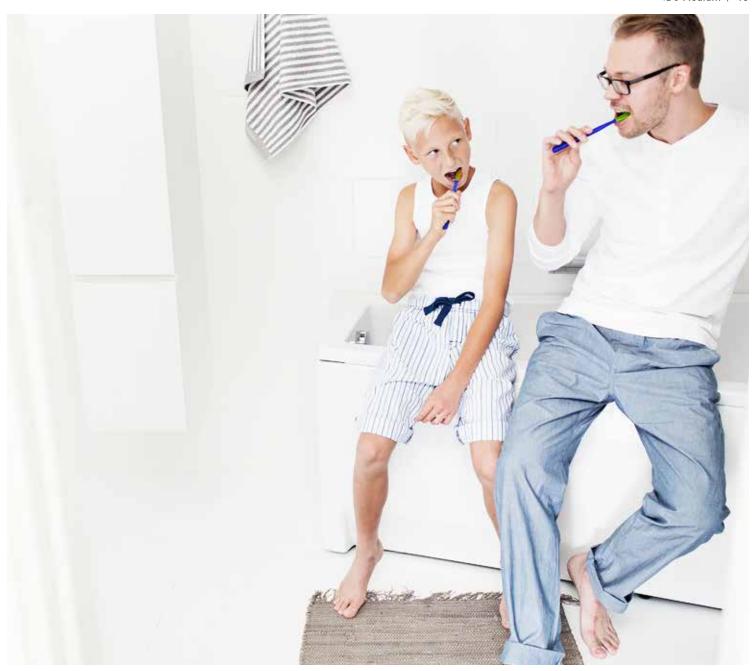

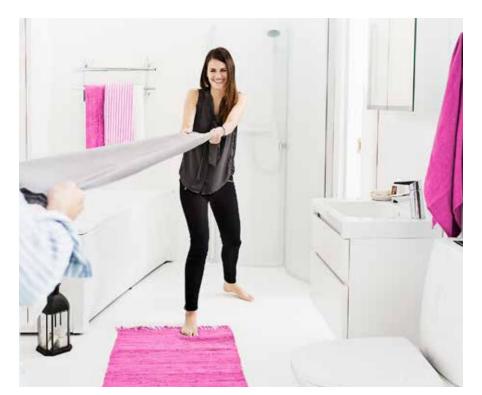

A folding shower screen is extra practical in a small bathroom. Along the bottom edge sits a sealing strip that presses against the floor when you open the shower. The screens are available with either straight or curved glass and can be fixed to the wall on the left or right. Find out more on page 78.

Create more storage in your bathroom with a mirror cabinet and base cabinet, for example. Most of our furniture ranges also have high cabinets that are ideal for tight spaces. The smallest cabinet is 22 cm wide and only 14 cm deep. And yet at a lofty 183 cm high, it offers a surprising amount of storage.

The asymmetrical bathtub can be placed on the right or left, depending on the shape and available space in the bathroom. Tall cabinets take up little floorspace but offer huge amounts of storage.

With the absence of floor profiles, the doors of the shower enclosure can easily be swung to the side when the shower is not in use. The strip at the bottom helps stop water collecting outside.

IDO SMART

IDO Smart is our name for all the solutions that make life easier for you. The IDO Smart range includes IDO's WCs, washbasins, furniture, showers and other bathroom products.

Smooth surfaces, clean lines and ingenious details all have the

same objective: to make cleaning the bathroom easy!

IDO Seven D Image bathtub is an incredible 450 mm deep. And yet the edge is a normal height. Drawers in the bathroom cabinet can be pulled out all the way to make maximum use of the space.

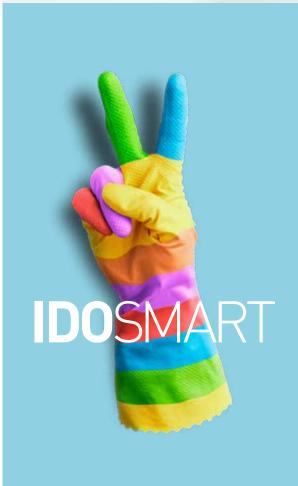

With the hygienic IDO Seven D Sensor WC, you can flush without touching a thing – simply slide your hand over the sensor. Move your hand slowly for a long flush and quickly for a short flush.

Sometimes the IDO Smart solutions are on the surface, but they can also be out of sight. The smoother glaze on WCs in IDO Seven D range reaches right under the rim.

The built-in Fresh WC function automatically releases just the right amount of toilet freshener after each flush. The freshening stick is inserted via the flush mechanism – a simple solution that is also safe for families with children.

A sturdy foot and wheels to make moving the shower cubicle easier are located below the shower tray. This enables the shower cubicle to be moved, for example, during cleaning.

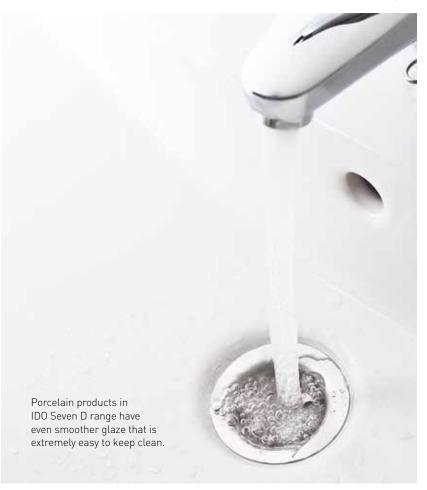

Slow Close seat closes gently and smoothly. Slow Close hinge is available for the WCs in IDO Seven D range.

WCs in IDO Seven D range also come with a practical Quick Release function. This makes it easy to remove the seat for cleaning.

The new Rimfree WC takes WC hygiene to a whole new level. Patented technology means efficient flushing with no place for bacteria to hide. The Rimfree WC is stylish, functional and easy to keep clean.

www.idobathroom.com

Have you thought about how important the bathroom is? We start the morning in the bathroom, and it's the last room we visit before we go to bed at night. It is therefore worth your time and effort and seeking professional help when it comes to planning and building a new bathroom. The end result is elegant, practical and safe.

BEGIN WITH THE DESIGN

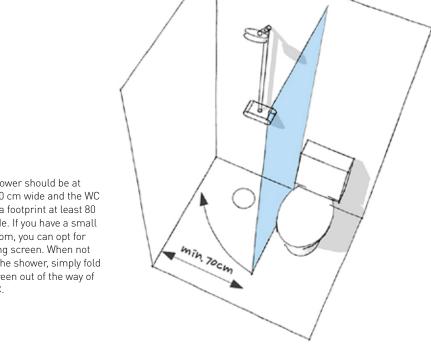

Start planning your bathroom by drawing out the room on paper. Mark the locations of doors, windows, pipes and plumbing. Shower and WC are usually placed by the plumbing, but the cabinets can be positioned wherever works best. All our furniture carcases and fronts are made of water-resistant material and have various water-repellent finishes that make it easier to keep the furniture clean. All our wooden bathroom furniture is protected with a hard-wearing acid-cured lacquer. Although our furniture is highly moisture-resistant, it should not be exposed to water for long periods

of time. Cabinets should therefore be placed a sufficient distance away from showers and bathtubs.

Even small bathrooms can be functional

The smaller your bathroom, the more important the design. Even a small space can become a fully functional bathroom with the right bathroom furniture – just look at the washbasin on page 103 that has

space for a small washing machine underneath. If you dream of a bathtub, a bath screen can be a great way to save space. Then you don't need a separate shower cubicle or enclosure and your dreams can come true even in a small bathroom.

The shower should be at least 70 cm wide and the WC needs a footprint at least 80 cm wide. If you have a small bathroom, you can opt for a folding screen. When not using the shower, simply fold the screen out of the way of the WC.

It is much easier to refurbish the bathroom if you don't need to move the drainage. IDO has WCs for both wall and floor drainage.

A wall-hung WC is perfect for refurbishments. Plumbing is concealed and you gain a practical shelf into the bargain.

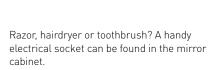

Create atmosphere with colour and lighting

Bathroom furniture is often the most noticeable feature of a bathroom colour scheme. If you want to brighten up your day, you can choose colourful or high-gloss doors/drawers. For a more subtle style, have a look at our wood-finish bathroom furniture. Lighting also affects the mood. A good bathroom has two kinds of lighting. As base lighting we always recommend ceiling lights. Soft general lighting gives the bathroom a pleasant and calming feel and is sufficient for a relaxing shower or a lovely bathtub. Correctly located task lighting is, however, important when you need to see better, for example at the mirror or when sorting laundry.

Ask for professional help

Always get help from a professional when renovating your bathroom, so that you have the right waterproofing and floor incline towards the drain. Electrical installations require a qualified electrician by law.

A well-planned and designed bathroom provides enjoyment for many years. So get comfy and read on, as we offer useful information that will make your time in the bathroom even better.

With good planning and right products, you'll find space for all the essentials even in a small bathroom - from a washing machine to a WC and from a shower to furniture with space for storage.

THIS IS THE WAY TO TAKE GOOD CARE OF YOUR BATHROOM

A beautiful and functional bathroom is an investment that raises living standards and the value of your home. Take good care of it and in return it will serve you well for years.

Furniture

All our cabinet frames and fronts are moisture-resistant, but should not be exposed to water for long periods. Cabinets and drawers should therefore be placed a sufficient distance from the bathtub and shower. Wipe up water splashes with a dry cloth after use.

Shower

Wipe down shower screens after showering for easier maintenance. Clean the shower with mild detergent. If the shower tray is scratched or discoloured, you can treat it with polish and wax it. Deeper scratches can be sanded away. Our shower cubicles have practical wheels that mean the cubicle can easily be moved when you need to clean underneath. Our shower trays have a detachable front panel to make cleaning even easier.

WCs and washbasins

When creating our porcelain products, we take extra care to make sure they are easy to clean. Our porcelain washbasins and WCs are simple to keep clean with mild detergent. All WCs and washbasins in IDO Seven D range feature a smoother glaze, which decreases dirt accumulation and makes cleaning easier.

Bathtubs

Bathtubs should be cleaned with mild detergent and a soft cloth to avoid scratching the surface. Scratches in sanitary acrylic can be sanded and polished away.

What do I do if something breaks?

Keep your receipt. Porcelain products made in Finland come with a 10-year warranty and fitted flush mechanisms have a 5-year warranty. All our products are covered by a warranty of at least 2 years against all construction and manufacturing faults and defective materials.

Phosphate-free IDO Showerclean is an easy-to-use and eco-friendly detergent for effective cleaning of showers and bathrooms.

Where can I get spare parts?

Correctly used and regularly maintained, our products will serve you for many years. We also carry a wide range of spare parts for all our products. For more information on spare parts, see the installation and care instructions that accompany each product.

IDO BATHROOM FURNITURE

Cabinets and their colours usually form the most visible part of bathroom interior. If you need a bit of cheering up, you can go for colourful or glossy doors. If you want to tone it down, have a look at our wood-coloured door options.

Remember to place cabinets correctly

While colours and materials are a matter of taste, cabinet placement is all about functionality. Our cabinet cases and front parts are made of humidity-resistant material featuring various humidity-resistant coatings, making the cabinets easy to keep clean. All wooden furniture is protected with durable acid-curing lacquer.

to install the furniture at an appropriate distance from the shower or bathtub. If any surfaces of the furniture get wet, they should be dried up with a cloth.

IDO cabinets are delivered assembled

Our cabinets are usually delivered preassembled, making their installation quick and easy.

The furniture is installed on or against walls, and supporting legs are available as accessories.

Set the mood with lights

IDO Reflect mirrors are equipped with fluorescent or LED lights. Fluorescent light imitates daylight. Therefore, when you look in the mirror, you should see yourself in correct lighting. LED lights provide bright lighting with minimal energy consumption.

IDO SEVEN D

range provides clean lines and refreshing simplicity to your bathroom. The bathroom furniture is 400 mm deep with white and grey colour options.

IDO TREND range brings together pure Nordic design and Italian minimalism. The bathroom furniture is 500 mm deep with white, grey, black ash and elm colour options.

For more information, please visit www.idobathroom.com

With IDO SELECT furniture only your imagination sets the limit. This furniture is available in three depths: Small, Medium and Large and in almost 2000 colours to choose from! Add the final touches by selecting handles and

drawers to your own

liking.

IDO RENOVA PLUS is a compact line for smaller bathrooms. The depth range is 230-320 mm and the colour options are white and dark grey.

Live wood

The beauty of wood lies in the way it lives. The appearance of wood varies, for example, according to its habitat and age. This means that the colour and patterns of wooden furniture may vary between the images of the catalogue and the furniture showcased in shops or delivered to you. With age, the colour of the wood may become deeper and darker.

For material options, see page 57.

Simple is beautiful. The simplistic design of the IDO CLASSIC range brings style and functionality to both bigger and smaller bathrooms. Colour options are oak and dark oak.

The base cabinet provides additional storage space. Both drawers pull out completely. Practical inner compartments in the upper drawers are standard and can also be purchased separately for the lower drawer.

No handles are needed here. The edges of the handleless door and the opened drawer have been bevelled in order to make room for fingers and provide a better grip.

A folding storage hook comes as standard on high cabinets on both sides of the door. Ideal for bathrobes or jewellery.

See page 58 for detailed product information.

New features for the IDO **Seven D** range

For more information, please visit www.idobathroom.com

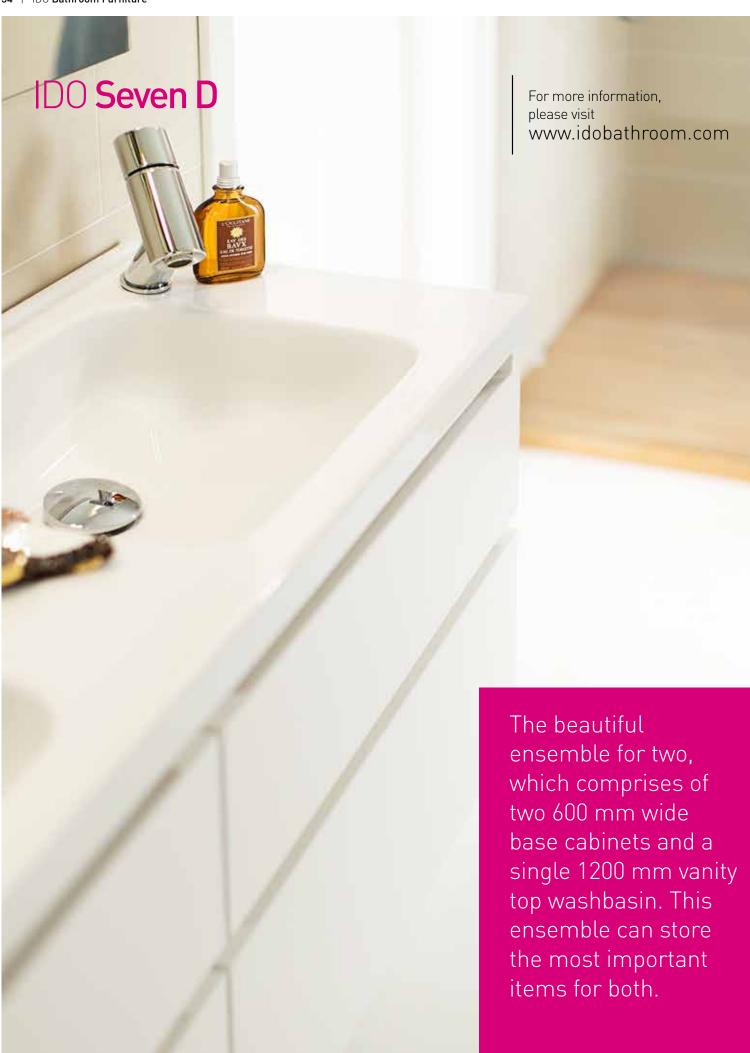

A power socket inside a cabinet makes it easy to plug in shavers, hairdryers or electric toothbrushes. Available as extra.

IDO Seven D | Suite 123 IDO Reflect flat mirror: W 600, H 640, D 38 Vanity top washbasin: IDO Seven D W 600, D 400 Base cabinet: W 595, H 450, D 370

IDO Seven D | Suite 125 IDO Reflect mirror cabinet: W 1200, H 550, D 120 Vanity top washbasin: IDO Seven D W 1200, D 400 Base cabinet x 2: W 595, H 450, D 370

The effective fluorescent light illuminates both washbasin area as well as the top of the cabinet. Fluorescent light imitates natural daylight which is convenient when doing your make up. Both the frame of the cabinet and light profile are made of aluminium and a socket is included. Cabinet is available in same sizes as the IDO Seven D base cabinets (600, 800, 900, 1000 and 1200 mm).

The furniture in the IDO Seven D range is ideal for bathrooms of all sizes. Base cabinets and washbasins come in five different widths: 600, 800, 900, 1000 and 1200 mm.

IDO Seven D | Suite 126

IDO Reflect mirror cabinet: W 900, H 550, D 120 High cabinet: H 1620, D 390, W 300 Vanity top washbasin: IDO Seven W 900, D 400 Base cabinet: W 895, H 450, D 395 Top cabinet: W 300, H 600, D 185

The base cabinet and corner mirror mounted to the wall are true wonder products! The corner mirror also has extra milk glass shelves that are attached to the wall.

IDO Seven D | Suite 118 Washbasin: IDO Seven D, W 430, D 505 Base cabinet: black ash W 300, H 500, D 300

Northern purity and Italian minimalism perfectly characterize IDO Trend line items, which are suitable for bigger bathrooms. The style represents the freshest of Scandinavian trends.

IDO Trend acts according to its name and carefully follows current trends. One of the material options is elm, which combines the best qualities of real wood: it is hard, durable and has a wonderful wood pattern.

The IDO Reflect flat mirror is a perfect fit for the IDO Trend furniture. The complete list of dimensions and prices can be found on page 66-67

Everything is at hand in the drawer under the washbasin. Successful design has made it possible to use this space as well.

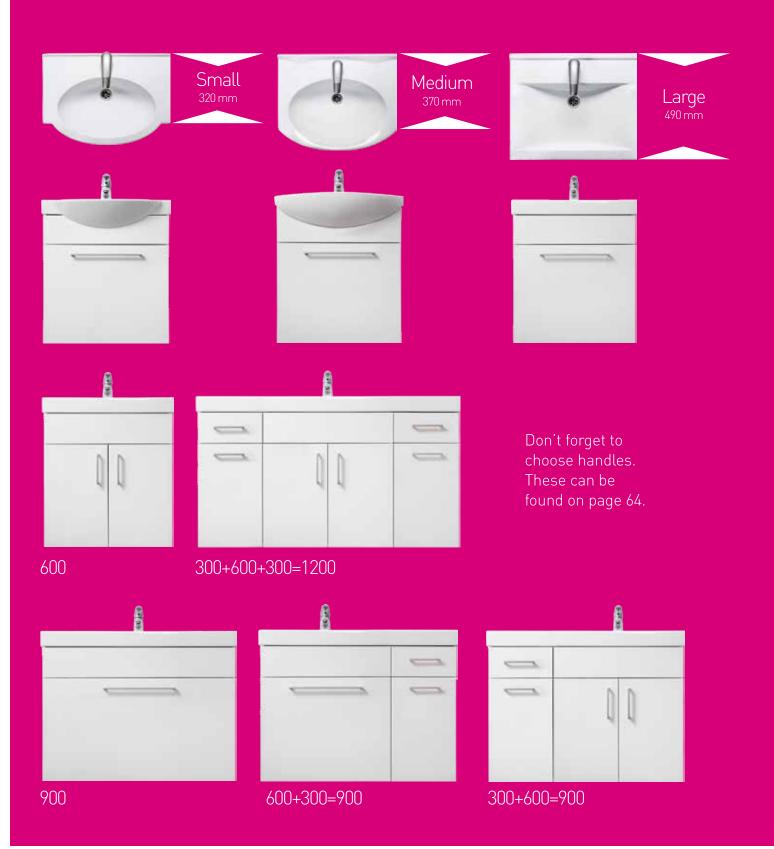

Sharing the bathroom in the evenings or brushing your teeth together in the morning? The IDO Trend base cabinet together with IDO Wave vanity top create a stylist set for two users which is wonderfully complemented by our new mirror.

IDO Trend | Suite 117

Vanity top washbasin: IDO Wave, W 1200, D 500 Base cabinet: black ash W 1190, H 500, D 485 IDO Reflect flat mirror: L 1200, K 640, S 38

IDO Select product dimensions

The items of IDO Select line are divided into three categories based on their depth. IDO Select Small, meant for smaller bathrooms, is only 320 mm deep. Medium comes in 370 mm depth. If there is more space, it pays to choose IDO Select Large with 490 mm in depth. The width is the same for all items of furniture: 600, 900 and 1200 mm.

IDO Select NCS shades A bathroom created to match its user. Add colours to your bathroom – almost 2000 shades. NCS shades help you to create exactly the kind of furniture that you desire.

IDO Select line materials can be found on page

All shades are available with square or bevelled edges. The frame is always white. Five-weeks' delivery. Orders on a separate form.

Colour sample, smooth NCS S 3055-R30B

Colour sample, smooth NCS S 1070-R10B

IDO Select Small

High cabinet is available in three different versions: with glass doors, mirror doors or with two doors and shelves in between. The cabinet with mirror door is a compact solution for a smaller bathroom. Behind the glas door you can include an elegant lighting.

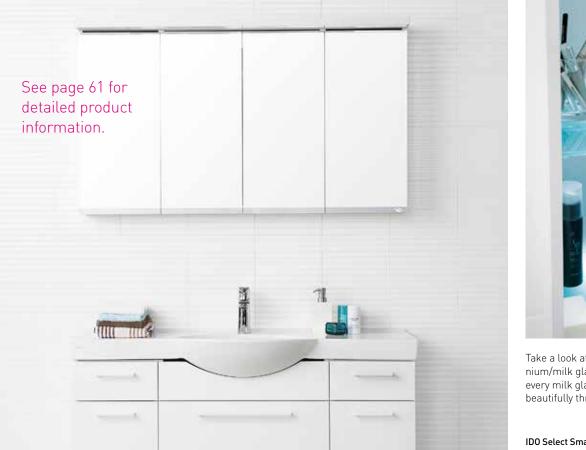

IDO Select Small | Suite 85 C

Vanity top washbasin: IDO Shape, W 600, D 330/435 Base cabinet with drawers: W 594, H 620, D 320 IDO Reflect LED mirror cabinet: W 594, H 695, D 140/220 Top cabinets: W 477, H 297, D 200 High cabinet with mirror door Total width: 1,700 mm

The standard colour white, black NCS S9000-N and other colours are delivered according to customers'

IDO Select line has inner drawers where you can hide smaller items, and a big drawer where you can place compartments that keep everything in order. The drawers close smoothly.

Take a look at the high cabinet with aluminium/milk glass door. A LED light behind every milk glass shelf makes the light glow beautifully through the glass.

IDO Select Small | Suite 87

Vanity top washbasin: IDO Shape, W 1200, D 330/435 IDO Reflect LED mirror cabinet: W 1188, H 695, D140/220 Base cabinet with drawers: high gloss white, W 594, H 620, D 320 Side cabinets with a drawer: high gloss white, W 297, H 620, D 320 Handle: 97637 and 97638 high gloss white

IDO Select Medium | Suite 91B

IDO Mosaik 1200 vanity top washbasin: W 1200, D 385/500 Lower cabinet with drawers: black ash, W 594, H 650, D 370 Side cabinet with drawers, black ash, W 297, H 650, D 370 Handle: c/c 32 IDO Reflect flat mirror: W 1200, H 640, D 38

The led lights under the mirror cabinet illuminate the vanity top nicely and energy efficiently with a long life cycle. The bottom edge of the mirror features the fingerprint-resistant frosted glass.

IDO Select range symmetrical vanity top washbasin IDO MOSAIK 900 mm is simple and functional. There is handy space for makeup, toothbrush cups and soap on both sides of the washbasin.

The mirror cabinet features a daylight-imitating light for easy makeup application.

IDO Select | Suite 108 Washbasin: IDO Mosaik, W 900, D 385/500 IDO Reflect LED mirror cabinet Lower cabinet with drawers: NCS colour, W 891, H 650, D 370

IDO Select Large | Suite 92 White, in-line handle Taps are not included.

IDO Select Large | Suite 120

Optional NCS colour, in-line handle IDO Reflect Spot mirror cabinet Vanity top washbasin: IDO Wave W 600, H 70, D 500 Lower cabinet: W 594, H 620, D 490 Upper side cabinet: W 477, H 297, D 200

Standard colour white, red NCS 1070-R and other optional colours are delivered according to the customers' preferences.

The furniture in the IDO Select range allows you to choose any colour on the NCS scale. Select your favourite from among 2000 colours on the NCS colour chart.

Renova cabinets are available in white (smooth or facet/bevelled) and oak. Renova Plus furniture is available in white and grey. White door options include smooth or bevelled surface, other colour options are delivered with the smooth surface.

The IDO Renova Plus range is a practical, compact solution, handy for small bathrooms or the guest WC. This stylish grey suite includes a LED flat mirror, a washbasin, a lower cabinet delivered ready-assembled and a high cabinet with handles.

See page 65 for detailed product information.

> IDO Renova Plus Suite 122 IDO Reflect LED flat mirror Washbasin cabinet: grey W 594, H 620, D 320 High cabinet: grey W 300, H 1,830, D 320

Sufficient storage space helps maintain the cleanliness of your bathroom. The IDO Renova Plus range accessories include a functional sliding basket for clean towels or even dirty laundry.

A magnetic strip and magnifying mirror, available as extras, make life easier.

Halogen lighting is warm and pleasant.

LED lighting illuminates instantly and effectively. It also uses very little energy.

Mirrors can work wonders. They make the room feel larger, improve the lighting and can provide plenty of storage space useful features in a bathroom.

IDO Reflect LED flat mirror. LED lighting. Mirrored edging. Height 900 mm. Width 560, 600, 800, 900, 1000 and 1200 mm. The 1200 mm mirror has two lights.

IDO Reflect flat mirror. Fluorescent light. Height 64 mm. Width 600, 800, 900, 1000 and 1200 mm.

IDO Reflect Single mirror cabinet. Fluorescent light, electrical socket, two adjustable glass shelves and an extra mirror on the inside. The mirror door can be hung on the left or right. Height 600 mm. Width 500 mm.

IDO Reflect LED mirror cabinet. Fluorescent light above, LED lighting below, electrical socket. Height 695 mm. Width 600 (2 doors), 900 (3 doors) and 1200 mm (4 doors).

IDO Reflect mirror cabinet. Fluorescent light, electrical socket, two adjustable glass shelves and an extra mirror on the inside of the door. Height 550 mm. Width 600, 800, 900, 1000 and 1200 mm. The 1200 mm mirror has three doors.

IDO Reflect corner mirror. Choose the right or left-hung version. Height 750 mm. Width 285 mm. Wall shelves are available as an additional option.

IDO Reflect Grip mirror cabinet. Fluorescent light, two shelves and an extra mirror on the inside of the door. Electrical socket can be placed on left or right. Two sizes: 600 x 690 and 670 x 560 mm.

IDO Reflect Spot mirror cabinet. LED lighting, electrical socket, two adjustable glass shelves and an extra mirror on the inside of the door. Height 635 mm. Width 560, 600, 900 and 1200 mm. The 1200 mm mirror has four mirrored doors.

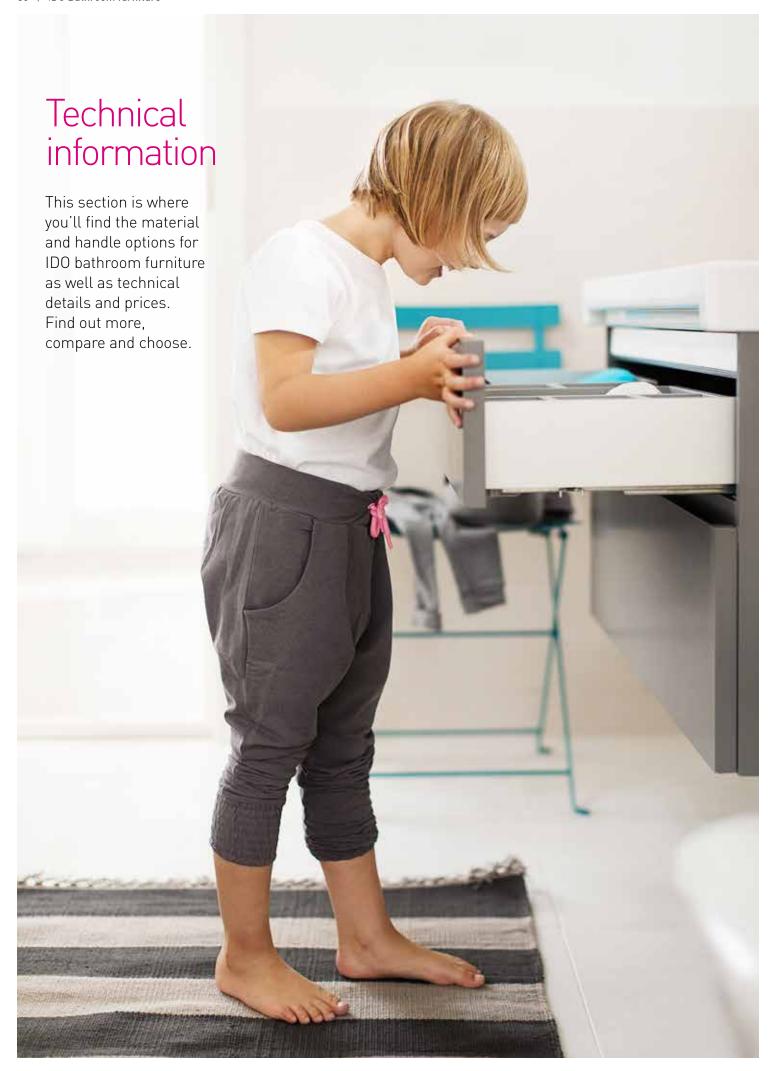

LED lighting installed under the mirror cabinet provides good illumination for the washbasin.

A fluorescent tube gives an even light similar to daylight.

The fluorescent light illuminates the whole mirror cabinet.

IDO Select cabinet product description

Cabinet cases are made of humidity-resistant chipboard (P5) with melamine coating. Painted doors (-20, -21, -27, -78) are humidity-resistant MDF (P3), with semiglossy paint finish. The reflective white door (-66) features a film coating exterior with laminated, humidity-resistant MDF [P3] interior. Wooden doors (-63, -77) feature a mirror made of humidity-resistant chipboard (P5) with timber trimming.

Handles: see next page.

 $^{^{*}}$ Optional semi-gloss NCS colour, delivery time 5 weeks, order in writing, no refund, white case.

IDO Select handles

IDO handles provide an abundance of options. This is a good thing because the handle is an essential part of the furniture. It is very important to have a handle that feels good to use. You can visit a retailer and try out various handles. Close your eyes and think whether you prefer the softness of round shapes or the sturdiness of angular shapes.

A variety of **SHOWER ENCLOSURES** are available. The model with a floor profile is more watertight. If you are not using the shower, the doors can be folded away.

A BATH DOOR is a stylish alternative for a shower curtain. It is easy to step into the bathtub as the door opens inward and outward.

A SHOWER CUBICLE includes an enclosure and a tray. Water will splash neither on the walls nor the floor, and so slipping on the floor becomes less likely. The pipes have been integrated in the structure of the shower, which looks neat and beautiful. Thanks to the adjustment possibilities, it is easy to install the shower cubicle on an inclined floor.

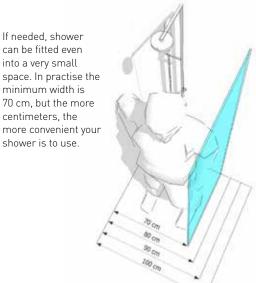

IDO SHOWERAMA SHOWER ENCLOSURES

are an excellent choice for a large or a small bathroom. Our range of products even includes swinging or sliding doors with fixed profiles.

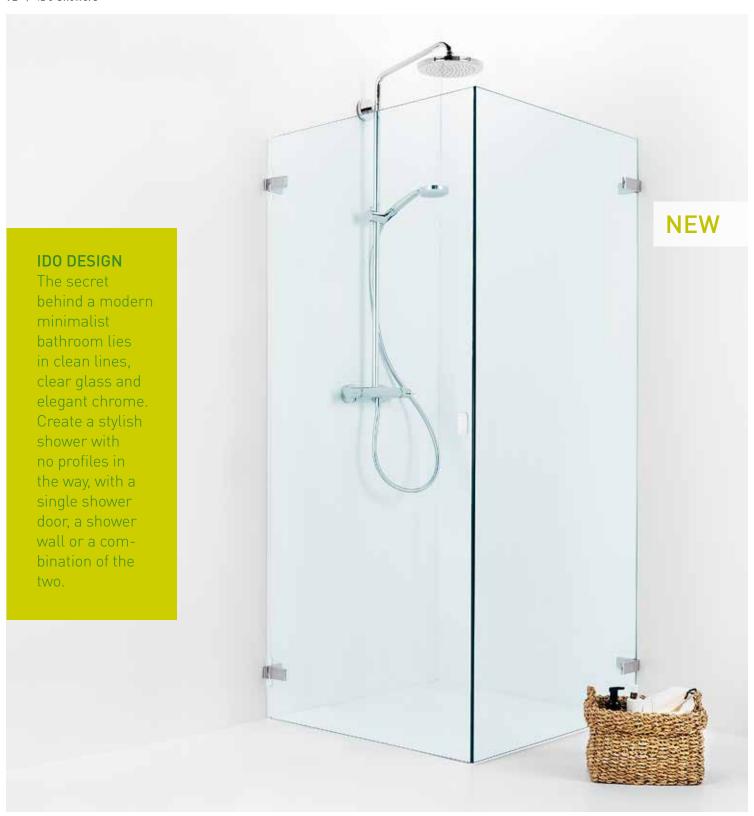

A SHOWER DOOR is a fantastic solution for a small bathroom. Swinging and fixed models are

IDO Design showers have no handles and the shower is just a stylish opening.

Stylized hinges and brackets complete the airy look of the showers. $\ensuremath{\,}^{\circ}$

Shower enclosure

IDO **DESIGN**

You can also order a shower door for nische solutions, supplied with a seal to fit between the door and the wall. The shower door has chrome hinges. The glass is 6 mm thick.

Height 2000 mm

Widths 700, 800, 900 mm Note! State when ordering whether you want the right or left-side version. Check that the floor incline complies with official standards and regulations.

Available from 1 April 2015.

Shower cubicle

IDO SHOWERAMA 8-5

Designer Dan Sevaldson / Hareide Design

Shower cubicles in IDO Showerama range are designed to give your bathroom a real sense of style. There are several different sizes, colours and glazing alternatives to choose from, which all adds up to hundreds of different options. The asymmetrical shape of the tray saves space, which means that IDO Showerama 8-5 fits even into a small bathroom.

This model features a shower column with a white floor profile. For the same price, you can select width and glass type: clear, frosted, smoked or Dandelion II patterned glass.

Height 2220-2250 mm (approximately 2240 mm with a steam room)

Shower cubicle

IDO SHOWERAMA 8-5

Designer Dan Sevaldson / Hareide Design

Personalize your bathroom with a coloured Showerama 8-5 shower cubicle. Small details matter and as a result create the whole.

Black adds masculinity. Get an impeccable end result by combining the black cubicle with Trend or Select series black ash bathroom furniture.

Red is full of energy. Red details of the shower cubicle match perfectly for example with the red WC seat.

White is always in. The stylish white model features matte silver or white profiles.

If you are looking for a shower, for example, for your summer house, take a look at IDO Showerama 8-5 – the lower shower cubicle model. This model is perfect for bathrooms with low ceilings.

> Regular height of IDO Showerama 8-5 shower cubicle is 2220-2250 mm. Available also in lower version of 2120-2150 mm. Lower model comes only with the tray in size of 900 x 900 mm.

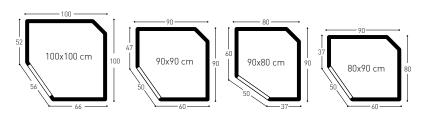

Showerama 8-5

IDO Showerama 8-5 range provides suitable shower cubicles for your bathroom. For more information, please visit our website at www.idoshowerama.fi.

The stylish door handle features the same design as the shower tap handles, providing solid grip even with wet hands. The quality handle stays clean year in and year out.

Shower trays come in four sizes: 1000 x 1000 mm 900 x 900 mm 900 x 800 mm 800 x 900 mm

Thanks to the new tray design, the door frame is 500 mm wide. The door slides effortlessly and shuts tightly. Functionality is ensured with a magnet fitting.

TAP HANDLES are designed to be easy to handle with wet hands and soapy fingers. The heart of the shower is Oras thermostat water mixer. IDO Showerama 8-5 shower cubicles are delivered with two practical shelves made of clear plexiglass.

The large drain is both stylish and functional. Water is efficiently removed, and the drain is easy to keep clean.

Convenient wheels make it easy to move the shower cubicle, for example during cleaning. Both the wheels and the supporting leg are adjustable, enabling the shower cubicle to be installed straight even when the floor is tilted.

The new attachment mechanism means the front panel is easy to remove while cleaning.

IDO SHOWERAMA 8-5 SHOWER CUBICLE

Add the finishing touch to your shower cubicle with the right accessories. We are constantly expanding our range: the most up-to-date list can be found on our homepage – www.idobathroom.com

The steam hood will not let the steam spread outside. The steam hood rises to 113 mm above the top profile, maximum height is approx. 2240 mm.

Complement your shower with some crystal clear luxury. The durable but stylish seat is made of transparent plexiglass.

Beautiful and practical decorative panel is equipped with a towel hook and adds the final touch to the whole set.

IDO Showerclean

IDO Showerclean is an easy-to-use general cleaner for showers and bathroom removing stains and calcification.

The design of the IDO Showerama showers makes them particularly easy to clean with Showerclean. The glasses are textured only on the outside, making the smooth inner surface easy to clean. The shower doors and cabins have been designed with a minimum amount of screw holes and other dirt-gathering holes. The cubicles are completely silicone-free, reducing bacteria accumulation. The wheels of the Showerama shower cubicles enable them to be moved during cleaning, making the process especially easy using Showerclean. This also allows you to clean the floor under the shower cubicle.

IDO Showerama 8-5

The shower cubicle includes a marble tray, Oras thermostat faucet, a shower set, top shower, fixed shelves and white aluminium profiles. Height 2220 mm. Adjustment margin +30 mm.

Here you will find some of the product numbers for our bestselling models, selected based on the type of glass. Choose the one that best fits your needs or make a complete set out of the parts. Price list for them can be found at the bottom of the page.

Shower enclosure

IDO SHOWERAMA 8-4

IDO Showerama 8-4 shower enclosure's beautifully curved doors rise 8 mm when opened. The model comes without a bottom profile. The shower enclosure can be mounted on an inclined floor. The bottom edge has a long seal which ensures that water flows away from the shower. The doors turn inward and outward and close tightly as they are equipped with a magnetic seal. IDO Showerama 8-4 shower enclosure is also suitable for bathrooms with surface plumbing.

Dimensions and glass options are shown on page 92-93.

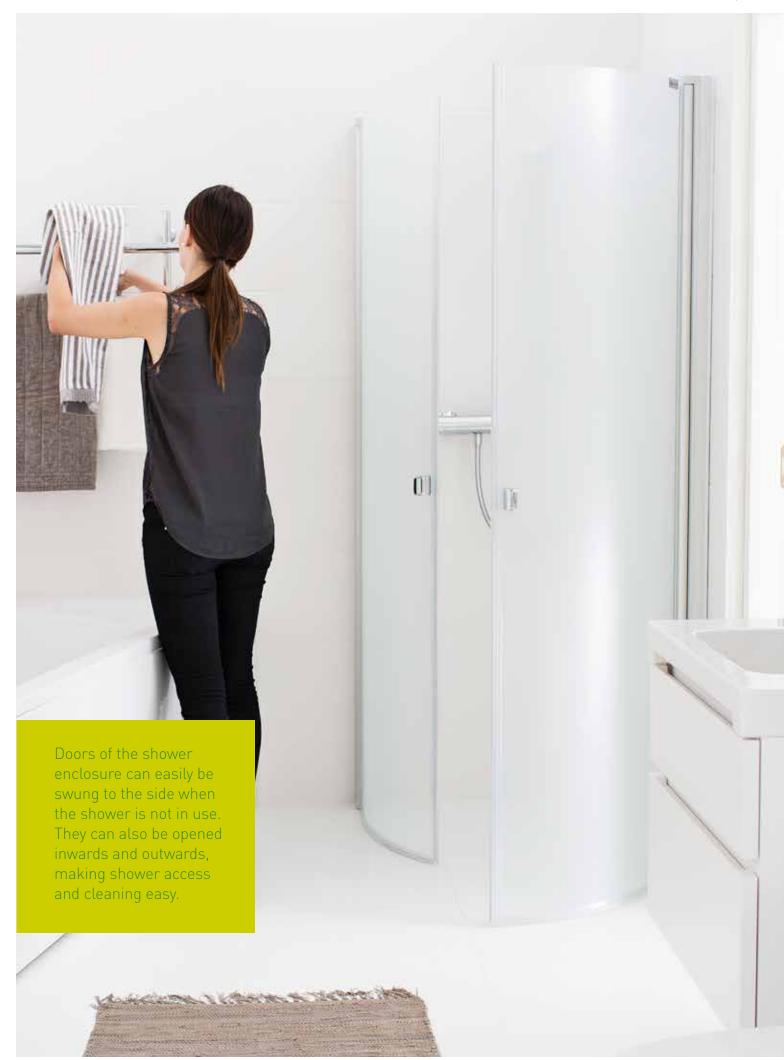

Height 1950 mm

With its elegant curves IDO Showerama 8-4 shower enclosure leaves more space in your bathroom.

Choose from four different glass types: clear glass, smoked glass, frozen glass and Dandelion II.

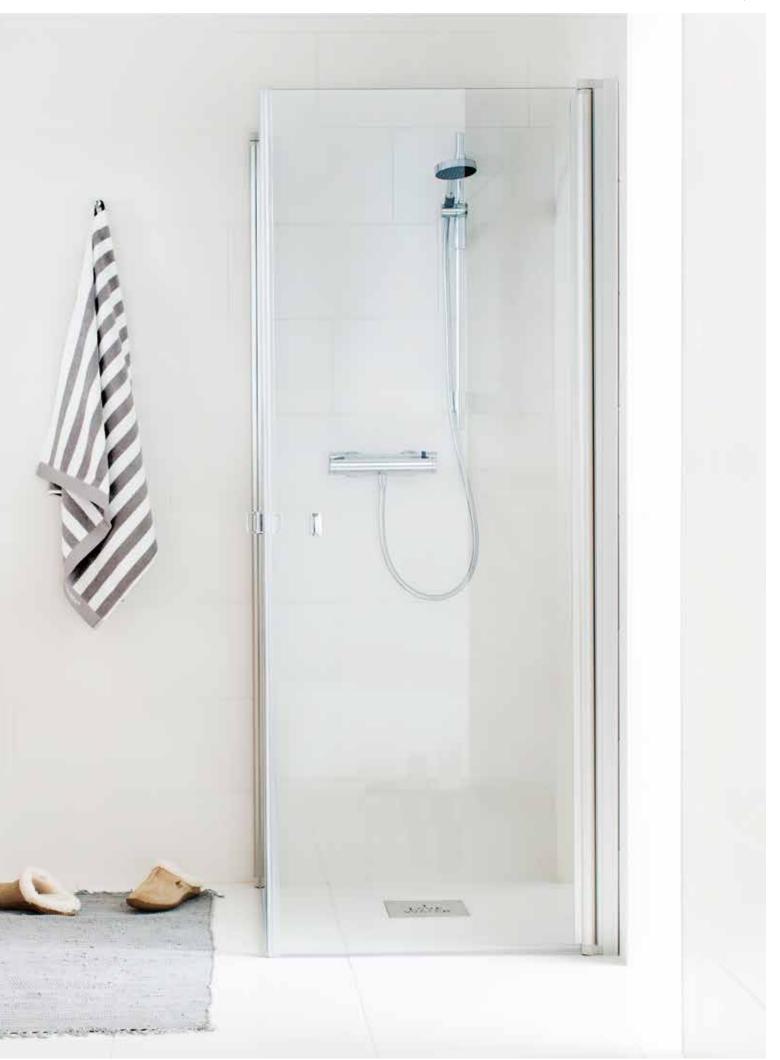

IDO SHOWERAMA 8-02

IDO Showerama 8-02 shower enclosure comes with straight doors which rise 8 mm when opened. The model does not include a bottom profile, but can be mounted on a floor under an angle. The doors can be easily pushed aside when the shower is not in use. The bottom of the doors has a long seal and in between there is a magnetic seal which enables the doors to close tightly. IDO Showerama 8-02 shower enclosure is suitable for bathrooms with surface plumbing.

Dimensions and glass options are shown on page 92-93.

Height 1950 mm

Shower enclosure

IDO SHOWERAMA 8-3

Designer Dan Sevaldson / Hareide Design

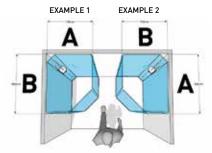

IDO Showerama 8-3 shower enclosure comes with an adjustable floor profile which makes the shower truly stable and watertight. The asymmetric shape of the shower saves space and and thin profiles are elegant. IDO Showerama 8-3 shower enclosure is also suitable for bathrooms with surface plumbing.

Height 2000 mm

Dimensions and glass options are shown on page 92-93.

The version 700 x 900 mm and 900 x 700 mm in Dandelion II includes the door in Dandelion II. The side glasses are clear glass.

Inform us of the shower dimensions as follows

Always give us measurement A first.

Example 1 Dimension A = 800 Dimension B = 900Required space: 800 x 900 mm

Example 2 Dimension A = 900 Dimension B = 800 Required space: 900 x 800 mm

DO Showerama DETAILS

The door to the IDO Showerama 8-5 cubicle, 8-3 and 8-1 enclosure has a mechanism at the bottom that can easily be detached from the track for cleaning.

The door slides easily thanks to top-grade bearings. A safety mechanism makes sure there are no accidents even if you open or close the door a little quicker than usual.

The handle is the icing on the cake, offering a good grip even with wet hands. The handle is available in two finishes. chrome and brushed aluminium.

The floor profile in the IDO Showerama 8-3 and 8-1 shower enclosure has feet that are easily adjustable to account for the slope of the floor.

The flexible strip along the bottom follows the contours of the floor to give a good seal.

Shower enclosure

IDO SHOWERAMA 8-0

IDO Showerama 8-0 shower door opens as wished – inward or outward. The bottom edge is equipped with a long seal which reduces the amount of water that flows out of the shower. Several widths are available: from 700 mm to 1200 mm.

In case of dimensions of 700-900 mm, there is one door and wider solutions have two doors. IDO Showerama 8-0 shower enclosure is suitable for bathrooms with a steep incline and surface plumbing.

Height 1950 mm Adjustment margin -20/+20 mm.

Dimensions and glass optins are shown on page 92-93.

Model 8-0 with one door, dimensions 700-900 mm. Model with two doors, dimensions 950-1200 mm.

Shower sliding doors

IDO SHOWERAMA 8-1

IDO Showerama 8-1 sliding door is a stylish and watertight solution for a niche. It comes in different widths: 1250 - 1750 mm. One of the glasses is fixed, one is sliding. The place of the fixed glass can be changed. A luxuriously wide door makes the usage pleasant. Wall profiles have enough space for pipes. An additional profile of 60 mm available.

Dimensions and glass options are shown on page 92-93.

Height 2000 mm

Adjustment margin -20/+20 mm.

Fixed shower wall

IDO SHOWERAMA 8-20

Simple and elegant shower screen is mounted as fixed and it is also suitable for bathrooms with surface plumbing. In frosted glass IDO Showerama 8-20 works also as a space divider.

Available in several widths, ranging from 400 mm all the way to 1000 mm.

Dimensions and options of glasses are shown on page 92-93.

Height 1950 mm

Special height 2250 mm available in width 500 and 600 mm.

Shower door

IDO SHOWERAMA 8-01

IDO Showerama 8-01 is a straight shower door of clean design. IDO Showerama 8-01 is equipped with hinges which enable you to fold it away when the shower is not in use. The door can be made right or left handed, and it can be fixed to the left or right wall. The bottom edge of the enclosure has a long seal which prevents water from flowing out of the

Dimensions and glass options are shown on page 92-93.

Height 1950 mm

Special height 2250 mm available in width 680 mm and 880 mm.

Bath door

IDO SHOWERAMA 8-40

IDO Showerama 8-40 is practical and also a stylish alternative to wet shower curtains. The hinged door opens in both directions. It is straight, made of glass, and its top edge is slightly rounded.

Dimensions and glass options are shown on page 92-93.

Height 1400 mm

IDO showers are durable, safe and easy to clean, something you will continue to appreciate in the years to come.

Size options

Add the finishing touches to your bathroom with the shower. You can choose between a number of safety glasses.

DO WASHBASINS

During their life cycle washbasins put up with a lot of wear and tear. They serve as the cleaning place for dirty hands and little laundry, and some of the detergents can be quite harsh on the surfaces.

Washbasins have to endure rough handling. The washbasin mounting should also be durable. The structure of your bathroom wall determines whether screws are enough or if brackets are necessary.

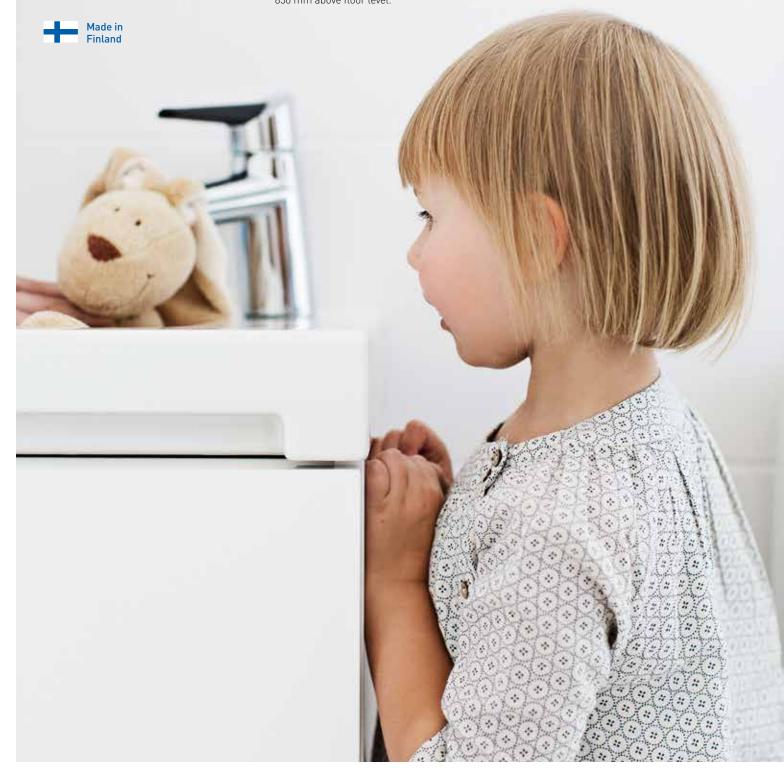

IDO washbasins are glazed porcelain. The material is easy to keep clean and bright year in and year out. Porcelain is a natural material, which sometimes results in slight variations in the dimensions of the washbasins (2%). Please be mindful of this when measuring the location for your new washbasin.

The location of the washbasin depends on the location of the water and sewage piping. Although the piping can be rerouted, the easiest way is usually to install the washbasin to fit the location of the piping. The recommended installation height for washbasins is 800–900 mm. Generally, basins are installed so that the top is approx. 850 mm above floor level.

IDO washbasins are divided into three categories: traditional washbasins, vanity tops as well as inset and lay-on washbasins. Our selection has the right washbasin for any space and location.

Smooth glazing makes cleaning easier

IDO Seven D washbasins feature a smoother Smart glaze. The slippery surface prevents dirt from sticking to it, making cleaning effortlessly

IDO Function for special needs

IDO Function series makes everyday life a little easier

Curved and functional

Washbasin 11107 and an adjustable wall-mounting 61056 are first and foremost meant for a physically challenged user. The height can be changed, if necessary.

Washbasin for physically challenged user 11107

Fixing screws are included in the set. Available also without an overflow opening and/or tap opening.

Adjustable wall-mounting 61056

Flexible inflow and drainage system.

When space is tight

Do you have a small bathroom and wish to fit a washing machine in it? You can nicely fit a small front loading machine. The washbasin is ideal for a user in wheelchair as the water trap will not be in their way. Item number 11166.

Washing machine basin 11166

B 600, D 590

Fastening for brackets, brackets (61018) need to be ordered separately. A set of plumbing couplings and a grid with the necessary parts are included in the set.

Complement your shower with some crystal clear luxury. The durable but stylish seat is made of transparent plexiglass.

IDO Washbasin accessories

In addition to being elegant-looking, a washbasin must also be durable. Using the right brackets, a washbasin can be mounted on any wall.

Our range includes different brackets for different washbasins.

Many washbasin brackets allow the addition of a practical towel rack. More information available at www.idobathroom.com

Easy to clean. The water trap minimises the need for harsh cleaning materials that may damage the pipes. Can be used as a

Tone: Chromed/white

determines your choice. A model with a wide foot is the easiest to mount and it hides the screw holes. If you are building a new WC, the range of options is wider.

WCs come in a variety of sizes and heights. High models are especially suitable for very tall or elderly people. Sufficient space should be ensured on both sides of the WC as small rooms can be uncomfortable. A WC is usually at least 80 cm in width.

hide. Patented technology for efficient flushing.

Accessories

If needed, the WC can be equipped with arm supports or automatic flushing. The availability of accessories varies from model to model. More information can be found on page 107.

IDO WCs are of excellent quality, and assures you of the fast and unfailing supply of

IDO design guarantees that WCs function with very little water. Ordinary flushing uses up only 4 litres of water and the smaller flush of the dual system only 2,5 litres. The amount of flushing water can be adjusted.

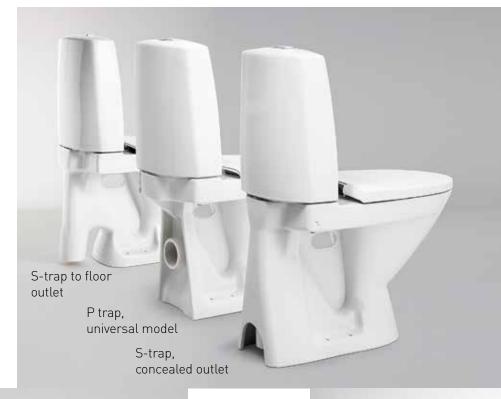

Smooth glaze makes it easy to keep clean

IDO Seven D serie WCs have a smoother Smart glaze that is extremely easy to keep clean.

Floormounted WCs

Floor-mounted WCs come in many varieties.
Our newer models are equipped with a dual flushing mechanism which reduces the consumption of water considerably.

Choose the height of the WC to match its users. Higher WCs suit taller people, but older people also tend to appreciate the comfort of a higher seat. We have three models: IDO Seven D 11, 12 and 17.

IDO Seven D
Image WC can be
used with both
wall and floor
outlet.
The cistern can
be fitted against
the wall and the
foot conceals the
waste pipe.

IDO Seven D 18 is a short model that is only 610 mm deep due to a flatter cistern.

IDO IT! RIMFREE

IDO IT! Rimfree

Dimensions and technical data can be found in the table on page 119. Fresh WC freshener is available when you use IDO Fix prewall system.

IDO it! Rimfree-WC

A revolutionary WC bowl that has no rim where dirt and bacteria could accumulate.

In a traditional toilet flushing water is directed into the bowl by the rim. It is still an efficient technology but unfortunately it is very easy for dirt and bacteria to accumulate under the flushing rim.

We worked out the perfect solution. The new IDO it! Rimfree toilet has an entirely new and efficient flush system, which does not need a rim anymore. The result is elegant, functional, hygienic and easy to clean.

The core of IDO it! Rimfree lies in its patented flushing system where the water is flushed in from the rear of the bowl and is directed to where it is supposed to go with exact precision – sufficiently cleaning the entire bowl (even with 3 l flush) without splashing.

In Rimfree there is no place for bacteria to hide

IDO it! Rimfree is very easy to clean. The design is so smooth and clear that all you need for simple cleaning are water and cloth. Also, it takes a lot less time and is environmentally friendly – no need for excessive use of detergents.

IDO FIX WALL-HUNG WC FRAMES

Our range of models includes two frames, a short and a high one. The dimensions of both frames are in accordance with current construction standards. It is easy to mount these in any bathroom due to their clever design and ability to adjust.

IDO Fix 66048 High frame and water tank W 500, D (150-235), H (1100-1300)

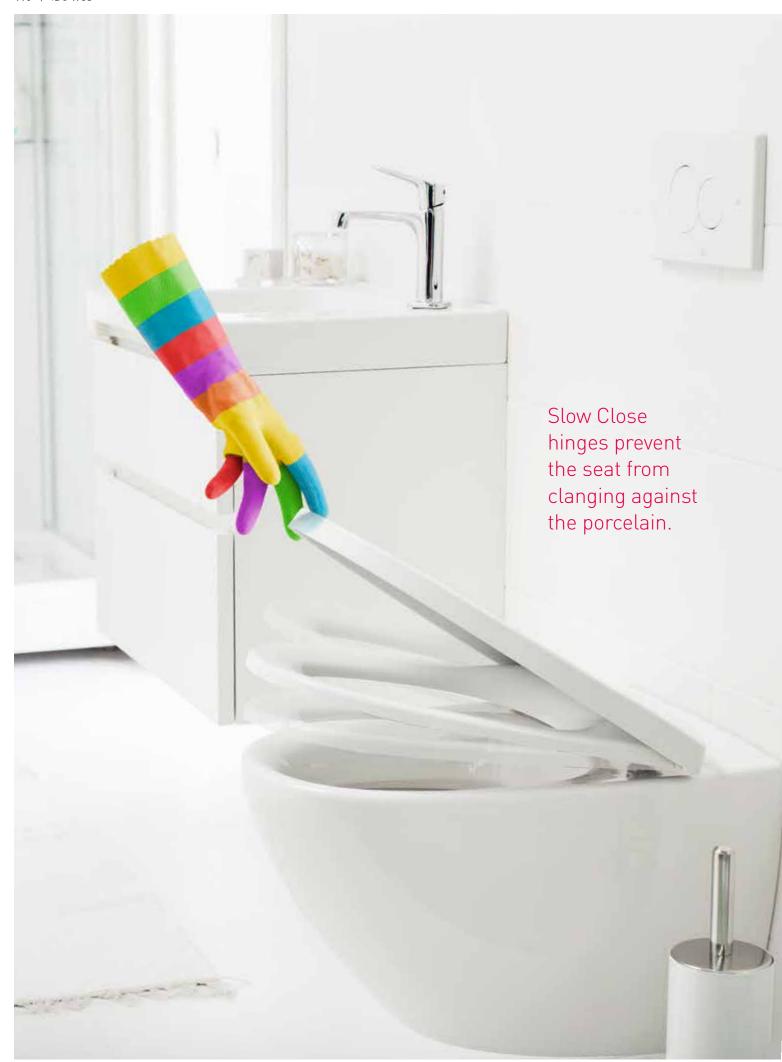

Also the wall-hung WC can be easily freshened

We recommend the high mounting bracket as a primary choice.

Fresh WC freshener is fully-automated. When the stick is used up, it can be replaced through the flush button. The WC functions normally even without the stick.

Available from April 1, 2015

IDO Seven D innovations helping your daily routines

HYGIENE

The optional IDO Seven D Sensor provides touch-free flushing – all you need to do is slide your hand over the sensor. Large and small flushes are performed with a slow motion and a quick swipe, respectively.

SMOOTHER SMART GLAZE MAKES CLEANING EASIER

All IDO Seven D WCs feature a new, smoother glaze, preventing dirt from sticking to the seat surface and making it easier to keep clean.

SMOOTHER CLEANING

IDO Seven Quick Release & Slow Close seats are easy to remove during cleaning, and they also close softly without a clang when lowered.

Quick Release & Slow Close hinges

Quick Release hinges

FRESH WC FUNCTION

automatically adds refresher for every flush.

CAREFULLY DESIGNED

Easy-to-clean everyday design.

DESIGNED AND MADE IN FINLAND

Functionality and spare part availability guaranteed. IDO Seven D is an ecological, water-saving choice.

OUR EXTENSIVE

product range covers all needs from renovation to construction work. The package can be completed with matching washbasins, furniture and baths.

CAN ALSO BE INSTALLED BY GLUING

Do not damage the water insulation of the floor with unnecessary screw holes.

EASY TO INSTALL,

regardless of the location of the drain and water connection.

DISCHARGE PIPE OPENING

The IDO Seven D 13 toilet seat is also available with laundry machine discharge pipe connection. This is a more practical and safe solution than a discharge pipe hung on the edge of the washbasin in locations without a dedicated discharge connection for the laundry machine.

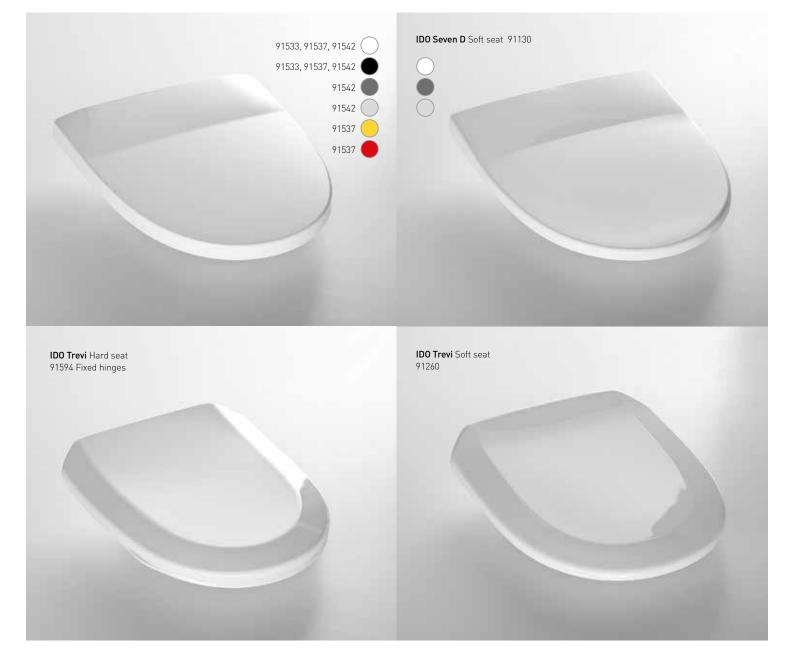

WC SEATS

Our extensive IDO series features a wide variety of colours. You can select a hard or a soft seat according to your preference. All hard seats feature durable metal hinges.

IDO Seven D Hard seat 91537 Quick Release mechanism 91533 Slow Close & fixed hinges 91542 Complete hinge package: Slow Close function with the optional Quick Release or fixed hinges.

In addition to a wall-hung WC, a prewall system and a flush button should be ordered.

^{*} Complete hinge package = A Slow Close seat that closes softly with a Quick Release mechanism (the seat is easy to remove) or a fixed installation.

IDO BATHS

If a relaxing bath is what you dream about, then this is the right moment to make your dream come true. Our wide range will offer a suitable bath for every bathroom. The smallest model takes up less than 1 m² (1400 x 700 mm) and the biggest ones are big enough for two people to take a bath together.

A built-in bath makes the bathroom look elegant but takes more space. If you choose a built-in model, remember that the bath also needs a maintenance hatch for cleaning.

Choose the right model

When choosing a bath, besides size you have to also consider how the bath will be used. If the bath will be used by the whole family, pay more attention to the fact that the material should be durable and easy to clean. An enamel-coated steel bath is a safe choice that will stand intensive use. If you yearn for long, peaceful moments in the bath and wish to bring some luxury into your life, choose a bath that is made of sanitary

acrylic. The surface of this material is soft and warm and it is easy to polish off surface scratches that appear over time.

Choose the right position

Warm water in the bath increases humidity of bathroom air, so it is important to have sufficient ventilation in the bathroom. Walls and floor surrounding the bath have to be covered with efficient waterproof sealant so that you can really relax and enjoy your bathing moments.

RECTANGULAR BATH

The overflow system of IDO Seven D Image bathtub is set into the front edge. The entirely symmetrical bathtub offers a relaxing position whichever direction you lie in.

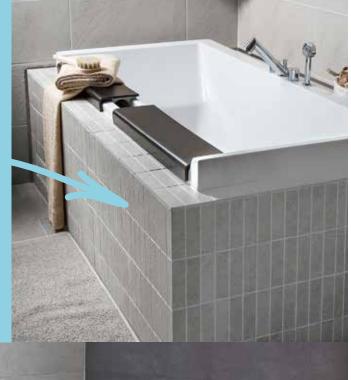

A **CORNER BATH** requires a bit more space but also offers a more pleasant time in the bath. Two adults can enjoy relaxing moments in this bathtub but it is also suitable for fun water games of children taking a bath together.

FREE-STANDING OR BUILT-IN BATH? Our catalogue offers the right choice for people looking for a traditional bath as well as for those in search of a luxurious bathtub with bold design.

An **ASYMMETRICAL BATH** fits also into small bathrooms because the smaller end is only 500 mm wide. Based on how much free space there is, you can choose a model narrowing to the right or to the left.

Rectangular bath

IDO **SEVEN D IMAGE** Designed by Adolf Babel

BATHING IS AN EVERYDAY LUXURY

for both children and adults. "A shower cleanses the body, but a bath cleanses the mind as well," says Adolf Babel, the designer, about bath magic. He has designed the IDO Seven D Image bath model.

IDO Seven D Image bathtub introduces a completely new solution to the world of bathtubs. The overflow system of the bath is on the front edge and the bath can be filled up to the very top. Bathing depth is increased in this way by 450mm, meaning more water and more enjoyment in the bath!

The front edge of the bathtub is lower than other edges which makes it easier to step into the bath and, when necessary, to get support from the water channel in the front edge. The other, higher edges offer good support for the bather and protect the wall against splashes. It is also possible to get a bath board as an accessory that can be used as an extra surface and a seat.

The innovative design of the bathtubs has been created by an internationally known and recognized designer Adolf Babel. "The aim of the design should always be functionality, and not only appearance," he verbalizes his credo. IDO Seven D Image is the proof that this claim holds water.

If you want your bathroom to feel like a spa, have a built-in IDO Seven D Image bathtub.

Bath boards that come as accessories are made of bended wood and come in black ash. Maintenance of the boards is easy, it is enough if they are simply oiled or waxed.

IDO SEVEN D 1400 / 1500 / 1600 / 1700

The innovative design of **IDO SEVEN D** rectangular bathtubs saves water but does not reduce the comfort. It is a pure pleasure to fill and use a bath that is narrower at one end.

9535301001

IDO SEVEN D line bathtubs have received new models; the first one of these to be introduced is the traditional and stylish IDO Seven D 1500 rectangular bathtub. This white, sanitary acrylic bath with a support frame is available in three sizes - and the associated models 1400 and 1600 diversify the product range with models suitable for both smaller and more spacious bathrooms. IDO Seven D 1500 rectangular bathtub. Support frame, front and side panels included in the set. Weight 27.0 kg, volume 185 litres and depth 420 mm. Faucet can be attached directly to the bathtub.

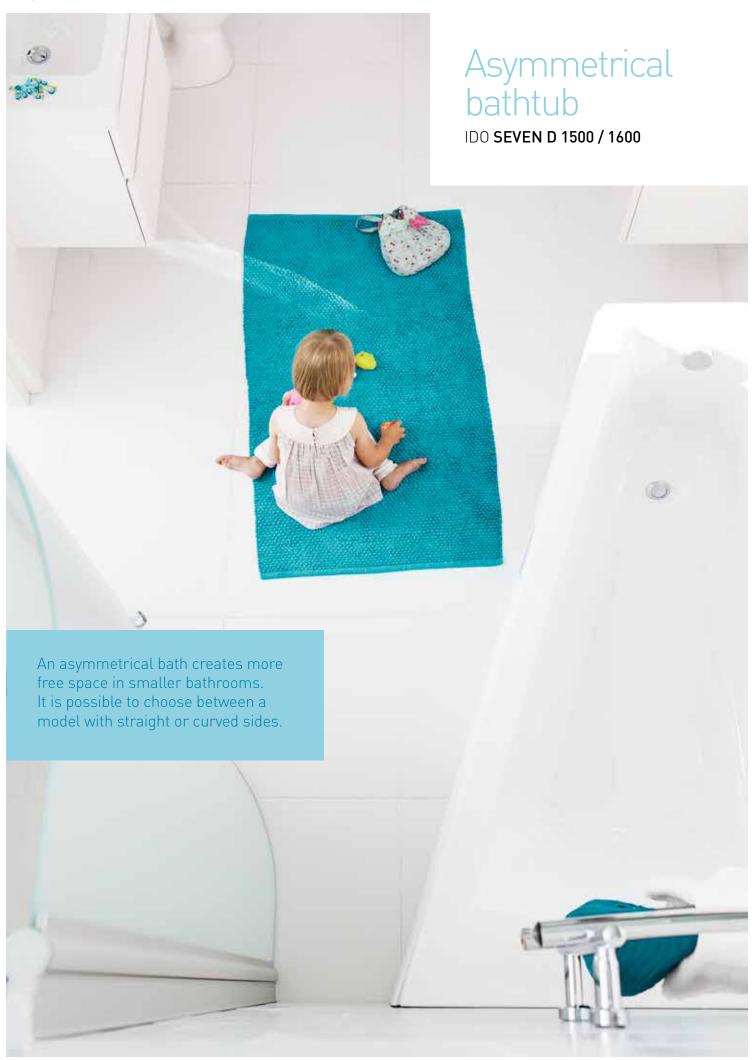

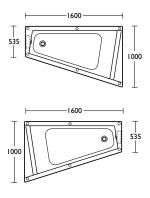

Bathtub W 1595, D 695, H 510 9400301001 Front panel W 1583, H 420 9402601001 Side panel W 653, H 420 9405001001 Volume 185 litres.

IDO Trevi Rectangular 1700

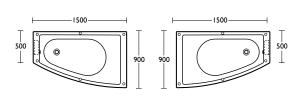

Bathtub W 1695, D 695, H 525 9400701001 Front panel W 1683, H 420 9403001001 Side panel W 653, H 420 9405001001 Volume 165 litres.

Asymmetrical bathtub. Support frame, front and side panels included in the set. Weight 40.0 kg, volume 230 litres and depth 440 mm. Faucet can be attached directly to the bathtub.

A bathtub with **STYLISHLY CURVED SIDES** suits also into smaller bathrooms. This model is only 1500 mm long and the side is only 500 mm wide. A pleasant bathing session is guaranteed despite its small dimensions because the volume of the bath is 210 litres. It is possible to choose between two models, right or left-handed. The faucet can be attached directly to the bathtub.
